 Note: CMP as of July 5, 2017

The goods and services tax (GST) became a reality from July 1st 2017. The new indirect tax regime unifies the country by making India a homogenous market. By removing the state barriers, trade becomes easier. While GST, in the current form may not be the perfect, but it is better than the earlier tax regime and was due for long. We revisit how GST is likely to benefit the economy.

Positive for macros: By removing the complicated indirect tax system, government has simplified indirect taxes; this is a big relief to the businesses. The new tax regime is expected to improve our ease of doing business ranking which will help in bringing more FDI inflows in the country. Also by keeping household items in the lower tax bracket, government has ensured that GST does not exert inflationary pressure on the economy. GST also requires adherence to invoicing which is expected increase tax compliance. This will result in widening the tax base and increasing the tax collection. This is expected to be credit positive for the country and may lead to improve our credit rating.

Benefits for the corporate sector: GST has made India a single market which means companies will be able to sell their products/services at the same cost across the country. Single tax has also removed the state barriers which mean companies will be able to operate hub and spoke model on a more efficient manner. This will reduce the transport cost and bring efficiency in the operations. GST removes the tax differential between the organized and unorganized players and will help the tax compliant companies/businesses. This will remove the pricing advantage of unorganized players implying that organized players are expected to benefit.

Strong boost to the consumption sector: With the implementation of five different tax rates announced under GST, government has ensured smooth transition from earlier tax regime to GST. Under GST, due to the reduced logistics costs, household goods/services prices are likely to soften; this will help curbing the inflation in long term. The household items, FMCG products are already seeing price cuts. The automobile sector is also seeing ~3-4% price cuts in the most vehicle categories; this will be a boost to the consumption sector. Cement sector has also emerged as a beneficiary after GST rates.

Overall, we expect GST regime to be positive in the long term for the country. Though we do not deny supply disruption in the initial stages, a bumpier transition is not expected.

Owing to this, we make few changes in our portfolio, we add Maruti Suzuki which is expected to see strong volume growth owing to the price cuts after GST. We continue to hold Asian Granito and Blue Star from consumption sector, Mahindra Lifespace and Dewan Housing as housing theme. We also remain positive on Karur Vysa Bank, Alkem laboratories, Navkar Corp, KEI Industries and Siyaram Silk Mills.

Dewan Housing

- **Loan growth to remain strong going ahead:** Backed by healthy capital adequacy and increasing demand for home loans DHFL's loan book is expected to report 20% loan growth over next two three years.
- **Strong Capital adequacy lends visibility for growth:** DHFL sold 50% stake held by it in DFHFL Pramerica Life Insurance Co Ltd which added ₹1969 cr to its net worth and increases its CAR by 400 bps, to 19.3% which should fuel growth for next 2-3 years.
- **Lower cost of funds will help maintain NIM:** DHFL has replaced high cost bank loans with the NCDs raised and it will continue to reduce its dependence on banks as its source of funding. This should help it maintain its NIM of 2.9%-3.0%. The recent capital received via stake sale should also aid to the NIM.
- **Outlook:** We expect the company's loan growth to remain 20% over next two years and earnings growth also is likely to be more than 20%. The stock currently trades at 1.6x FY2018E ABV. **We maintain Buy on the stock, with a target price of ₹520.**

Karur Vysa Bank

- **Loan growth to pick up from FY18 onwards:** KVB had a fairly strong loan CAGR of 14.9% over FY11-17. However, FY17 was year of consolidation and loan book grew by only 4.7%. We expect loan growth to pick up to 11% over FY17-19. Deposit growth is expected at 9% during the period.
- **Asset quality likely to stabilize going ahead:** KVB's slippages remained high during FY17 and hence GNPA's % went up to 3.58% vs 1.3%. However, large part of the troubled accounts has been classified as NPAs and hence gradually we expect the asset quality to improve.
- **NIM likely to see further improvement:** There were 25 bps improvements in NIM during FY17, with share of CASA growing and cost of fund coming down NIM is expected to improve further going ahead.
- **Outlook:** We expect KVB to post a strong loan book & earnings CAGR of 11% & 22% over FY2017-19E. The stock currently trades at 1.6x FY2019E ABV. **We recommend Accumulate rating on the stock, with a target price of ₹160.**

Asian Granito

- AGIL's current, vitrified sales (35%) are lower as compared to its peers like Somany Ceramics (47%) and Kajaria Ceramics (61%). Recently, AGIL has launched various products in premium segment. Going forward, we expect AGIL's profit margin to improve due to increase in focus for higher vitrified product sales, which is a high margin business.
- AGIL is continuously putting efforts to increase the B2C sales from the current level (35% in FY16). It is expected to reach up to 50% in next 2-3 years on the back of various initiatives taken by AGIL to increase direct interaction with customers like strengthening distribution network, participation in key trade exhibition, etc.
- In July FY2016, AGIL acquired Artistique Ceramic which has a better margin profile. Going forward, we expect the company to improve its operating margin from 7.5% in FY16 (excluding merger) to 12-12.5% in coming financial year. Artistique Ceramics has a contract with RAS GAS to supply quality natural gas at a discounted rate of 50% to current market rate, which would reduce the overall power & fuel cost of the company.
- We expect AGIL to report a net revenue CAGR of ~8.5% to ~₹1,169cr and net profit CAGR of ~39% to ~₹48cr over FY2016-18E. **We recommend an Accumulate rating on the stock.**

Blue Star

- BSL is one of the largest air-conditioning companies in India. With a mere 3% penetration level of ACs vs 25% in China, the overall outlook for the room air-conditioner (RAC) market in India is favourable.
- BSL's RAC business has been outgrowing the industry by ~10% points over the last few quarters, resulting in the company consistently increasing its market share (~7% in FY2014 to 10.5% at present). This has resulted in the Cooling Products Division (CPD)'s share in overall revenues increasing from ~23% in FY2010 to ~42% in FY2016 (expected to improve to ~47% in FY2018E). With strong brand equity and higher share in split ACs, we expect the CPD to continue to drive growth.
- Aided by increasing contribution from the CPD, we expect the overall top-line to post a revenue CAGR of ~16% over FY2016-18E and margins to improve from 5.3% in FY2015 to 7.3% in FY2018E. Moreover, the merger of Blue Star Infotech has infused cash and strengthened the balance sheet. **We recommend a Buy rating on the stock.**

Siyaram Silk Mills

- SSML has strong brands which cater to premium as well as popular mass segments of the market. Further, SSML entered the ladies' salwar kameez and ethnic wear segment. Going forward, we believe that the company would be able to leverage its brand equity and continue to post strong performance.
- The company has a nationwide network of about 1,600 dealers and business partners. It has a retail network of 160 stores and plans to add another 300-350 stores going forward. Further, the company's brands are sold across 3,00,000 multi brand outlets in the country.
- Going forward, we expect SSML to report a net sales CAGR of ~4% to ~`1,948cr and adj.net profit CAGR of ~10% to ~`106cr over FY2016-18E on back of market leadership in blended fabrics, strong brand building, wide distribution channel, strong presence in tier II and tier III cities and emphasis on latest designs and affordable pricing points. At the current market price, SSML trades at an inexpensive valuation. **We have an Accumulate recommendation on the stock and target price of `2,376.**

Maruti Suzuki

- The Automobile sector is expected to benefit from the GST implementation. The sector has seen a pick up in the volumes in FY17 as there were several positive factors like normal monsoon and lower interest rates.
- Maruti Suzuki continues to hold ~50% market share in the passenger vehicles. The launch of exciting models has helped the company to ride on the premiumization wave that is happening in the country. In the last two years, company has seen improvement in the business mix with the pie of the utility vehicles growing from ~4% to current 15%. With the 3-4 months of waiting period on these models, strong demand and GST led price decrease; we believe that this pie is expected to grow to ~20% in FY19E.
- Due to the favorable business mix, company has also been seeing improvement in the margins. Company has already moved from ~11-12% EBITDA margin range to current ~14-15% margin ranges. Together with higher operating leverage at Gujarat plant and improving business mix, we believe that company has further room to improve its margins. **We have a buy rating on the stock with the price target of `8,495.**

TV Today Network

- TTNL enjoys a strong viewership ranking in the Hindi and English news channel categories. The company's Hindi news channel – Aaj Tak has maintained its market leadership position occupying the No.1 rank for several consecutive years in terms of viewership. Its English news channel - India Today too has been continuously gaining viewership; it has now captured the No. 2 ranking from No. 4 earlier. Its other channels like Dilli Aaj Tak and Tez are also popular among viewers.
- Out of the 7 radio stations, TTNL has sold off 4 (Jodhpur, Amritsar, Patiala and Shimla) for ₹4cr. The remaining 3 stations are in the process of getting sold off to ENIL but the sale will have to wait until concerns raised by the MIB are resolved. Going forward, we expect them to be sold off and this would prop up the company's profitability.
- We expect TTNL to report a net revenue CAGR of ~10% to ~₹667cr and net profit CAGR of ~10% to ₹115cr over FY2016-18E. **We have a Buy recommendation on the stock and target price of ₹344.**

KEI Industries

- Healthy order book indicates strong revenue visibility: KEI's current order book (OB) stands at ₹3,233cr (segmental break-up: ₹2,154cr in EPC, ₹667cr in Cable, ₹200cr in EHV, ₹49cr in Substation, rest in EPC L1 business). Its OB grew by ~28% in the last 3 years due to strong order inflows from State Electricity Boards, Power grid, etc.
- Strengthening distribution network and higher ad Spend to increase B2C business: KEI's consistent effort to increase its retail business from 30% of revenue in FY16 to 40-45% of revenue in the next 2-3 years on the back of strengthening distribution network (currently 926 which is expected to increase ₹1,500 by FY19) and higher ad spend (increased from ₹2cr in FY13 to ₹7cr in FY16 and expected to spend).
- Exports to continue its growth momentum: KEI's export (FY16 - 8% of revenue) is expected to reach a level of ~14-15% in next two years with higher order execution from current OB of ~₹180cr and participation in various international tenders worth ₹500cr. We expect a strong ~26% growth CAGR over FY2016-19 in exports. We expect KEI to report net revenue CAGR of ~13% to ~₹3,392cr and net profit CAGR of ~26% to ₹124cr over FY2016-19E. **Hence we have an accumulate rating on the stock.**

Mahindra Lifespace

- MLF has 13 projects under implementation across cities. MLF has exhibited fast completion of projects compared to others. Sales cycle in ~65% of projects is faster than execution cycle, contrary to industry trends. This fast execution and sales is optimal, as it helps MLF in revenue recognition, inventory cycle (better than Oberoi, DLF), cash flows and profitability.
- MLF as of 4QFY2016 is pursuing ~4.0mn sq. ft. of sale of the total ~15.0mn sq. ft. of saleable area. Having sold ~60% of ongoing projects, we expect MLF to launch ~2.8mn sq.ft. of saleable area in rational way during 4QFY2016-2QFY2018E, across 6 cities. Maturity at existing projects, new launches give better revenue visibility for medium-term. Further, MLF is sitting on land bank of 11.0mn sq.ft across 4 cities, which allay any concern over long-term revenue growth.
- With Real Estate Regulatory Bill closer to reality, MLF should be minimally impacted, given their strong parentage and ethically implemented processes. In the longer-term organized, professionally run, well funded players would enjoy strong trust due to their reliable and fast execution strategies. With improvement in company's fundamentals, strong earnings growth visibility and long-term growth outlook, at current valuations of 1.0x FY2017E P/BV, MLF looks attractive. **We maintain Buy on MLF with target price of ₹ 522.**

Navkar

- NCL is one of the largest and one of the three CFS at JNPT with rail connectivity, helping it garner high market share at the port. NCL is in a massive expansion mode where it is increasing its capacity by 234% to 1,036,889 TEUs at JNPT and coming up with an ICD at Vapi (with Logistics Park).
- The ICD with rail link should benefit from first mover advantage in a region that has huge market potential and accounts for ~27% of volumes at JNPT. The ICD should be able to capture the EXIM volumes from the region through rail link that till now was being custom cleared at JNPT (Import) or being transported via road and consolidated at JNPT (Export). South Gujarat volumes will now head straight to the Vapi ICD; thus the company can now cater to bulk commodities and domestic traffic that it had been rejecting owing to capacity constraints at CFS.
- We expect NCL to successfully use its rail advantage and scale up its utilizations at both JNPT and Vapi ICD. **We have a Buy rating on the stock.**

Alkem Laboratories

- **Alkem** is 5th largest pharma company in the domestic market and also has presence in US. It derives 73% of its revenues from the Indian markets while the rest come from other countries. Alkem has a leadership position in the domestic anti-infective segment and is ranked #3 in Gastro-Intestinal and Pain/Analgesics segments. Company holds ~3.6% and ~7.9% market share in the formulations and overall prescriptions in the country.
- In the domestic market, company operates in acute and chronic segments. It is a prominent player in the acute segment and has forayed into the chronic segment from which it expects faster growth. Alkem has been outperforming the domestic industry growth which is likely to continue. Company is focusing on monetization of its pipeline (91 ANDAs) in the US with annually ~7-8 ANDAs launches growing the US revenues by ~26% growth rate from FY17-FY19E.
- Overall outlook remains strong with 15.8% CAGR in the topline and 15.4% CAGR in the bottom-line. **We have Buy rating on the stock.**
