* Overall ADTO is based on turnover for cash segment, notional turnover for equity futures & options and commodity segments. F&O ADTO is based on notional turnover for equity futures & options segments.

\$ Overall ADTO is based on turnover for cash segment, notional turnover for equity futures & commodity segments and premium turnover for equity options segment. F&O ADTO is based on notional turnover for equity futures and premium turnover for equity options segment.

^ Retail turnover market share for Overall Equity is calculated based on turnover for cash segment, notional turnover for equity futures and premium turnover for options segments. Retail turnover market share for F&O is calculated based on notional turnover for equity futures and premium turnover for options segments.

Commodity ADTO is calculated based on notional turnover across MCX, NCDEX and NCE.

Retail turnover market share in commodity turnover is calculated using notional turnover across MCX and NCE.

The phased implementation of index derivative regulations was completed by mid-March 2025. In April, our key performance indicators - gross client acquisitions, order volumes, and average daily turnover - remained steady month-on-month, reflecting continued operational resilience.

It is important to note that the F&O ADTO, as defined by the exchanges, is a sum of notional values from the Futures segment and premium values from the Options segment. Since notional values are inherently higher, the Futures segment contributes disproportionately to the overall turnover in value terms. The Futures and Options split is not available at this time but variations in Futures volumes can have significant impact on the F&O ADTO market share.

On the commodities segment, the decline in our market share can be attributable to a change in the ADTO volume mix between crude and bullion.

The above information is as per limited review by the Management Team. The Company intends to provide the updates on a monthly basis.

Thanking you,

For **Angel One Limited**
