- *Some risks may not be material individually but may be material when considered collectively;*
- *Some risks may have an impact which is qualitative though not quantitative;*
- *Some risks may not be material at present but may have a material impact in the future.*

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISK FACTORS:

BUSINESS RELATED RISKS

- 1. Operational risks are inherent in our business as it includes rendering services in contrasting environments. A failure to manage such risks including any errors, defects or disruption in our service or inability to meet expected or agreed service standards, could have an adverse impact on our business, cash flows, results of operations and financial condition.*

We are an integrated business services provider focused in offering Integrated Facility Management services and other Support Services to industries across multiple sectors. Our Integrated Facility Management service portfolio broadly includes (i) soft services such as housekeeping and cleaning services, disinfecting and sanitizing services, pest control, horticulture, and facade cleaning; (ii) hard service such as maintenance, repair, overhaul and performance management of electrical, plumbing and maintenance services (iii) Staffing Service where we supply the workforce for various support service; Our Support Services portfolio broadly includes (i) Employee Transportation services whereby we provide transportation services for the employees of our clients; (ii) Corporate Food Solution Services whereby we offer catering services for employees of our corporate clients; (iii) Supply Chain Management Services whereby we provide Third-party logistics service for our clients and (iv) Production Support Services whereby we supply the workforce to the manufacturing companies for production, material handling, and maintenance. In catering our clients with our service portfolio, we are supported by our Subsidiaries and Associate.

Certain operational risks are inherent in our businesses due to the nature of the industry in which we operate. We render various business services at customer premises in a number of environments. Our reputation is dependent upon the performance of the personnel we place with our customers and the services rendered by such personnel. Any errors, defects, or disruptions in service or other performance issues, or if our customers become dissatisfied with the performance of our personnel, or our account managers, or if they do not perform in accordance with the instructions or standards established by the customers or agreed by us, our business reputation and ability to maintain or expand our customer base may be adversely affected.

Our business operations, and in particular, our integrated facility management services, Employee Transport Services, Supply Chain Management service, Corporate Food Solution Services and Production Support Services are subject to hazards inherent in providing such services, including risk of equipment failure, production loss to customers, work accidents, food poisoning, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. Should any of these risks materialise, there may also be a loss in the reputation of our customers. While we believe we have adequate insurance coverage, we may be subject to substantial liabilities if we fail to satisfy applicable safety or health standards or cause harm to individuals or entities in the course of rendering our services, the impact of which may exceed the insurance coverage we maintain. Further, our success in these businesses is dependent on our reputation for providing quality services, track record of safety and performance, and our relationship with our customers. Adverse publicity resulting from an accident or other hazardous incident could result in a negative perception of our services and the loss of existing or potential customers.

We believe that we have in place adequate training and management policies and protocols, a failure to adequately address and manage risks inherent in our business, a failure to meet the operational requirements of our customers, or a failure to develop effective risk mitigation measures, or respond adequately to a crisis situation, could have an adverse effect on our reputation, customer retention, earnings and profitability and consequently, our business, cash flows, results of operations and financial condition may also be adversely impacted.

- 2. Our business revenue from operations is concentrated in a few business segments.*

We are an integrated business services provider focused in offering Integrated Facility Management services and other Support Services. Our Service Portfolio and our revenue from operations for Financial Year 2024, Financial Year 2023 and Financial Year 2022 are detailed as below;

Our operations	Revenue from Operations as on March 31, 2024	As % of Revenue from Operations	Revenue from Operations as on March 31, 2023	As % of Revenue from Operations	Revenue from Operations as on March 31, 2022	As % of Revenue from Operations
IFM Services						
IFM Services	23,119.25	65.04%	18450.56	55.98%	12343.52	52.30%
Support Services						
Production Support Services	1,447.13	4.07%	1142.89	3.47%	1433.66	6.07%
Employee Transportation Services	7,677.61	21.61%	9669.97	29.34%	7859.99	33.30%
Corporate Food Solution Services	1147.22	3.23%	866.48	2.63%	438.65	1.86%
Supply Chain Management Services	2147.46	6.04%	2828.84	8.58%	1525.31	6.47%

Our results of operations may fluctuate in the future depending on a number of factors, including but not limited to:

- our ability to increase and/or maintain the proportion of our high-margin business segments, compared to the proportion of our relatively thin margin businesses;
- award of new contracts and contract renewals, and the selection process and timing for performing these contracts that are subject to contingencies beyond our control;
- the size, complexity, timing of revenue recognition, duration, scope, pricing terms and profitability of significant contracts;
- changes in our pricing policies or those of our competitors;
- financial condition or business prospects of our customers; and
- unanticipated cancellations or contract terminations

As a result of these factors, our results of operations and cash flows may fluctuate from financial reporting period to period. A significant proportion of our operating expenses are fixed. Accordingly, unanticipated variations in our operations may result in variations in our results of operations in any particular financial period.

3. *A significant portion of our revenues are derived from a few geographical regions and any adverse developments affecting such regions could have an adverse effect on our business, cash flows, results of operation and financial condition.*

A significant portion of our revenue from operations are derived from our services offered to customer locations in state of Maharashtra. State-wise distribution of our Client Base based on contribution to our Revenue is as follows:

State	% of Revenue for Fiscal Year Ended FY24	% of Revenue for Fiscal Year Ended FY23	% of Revenue for Fiscal Year Ended FY22
Andhra Pradesh	-	0.99%	0.59%
Gujarat	9.44%	6.74%	8.39%
Haryana	0.14%	0.15%	0.04%
Karnataka	5.34%	3.49%	2.70%
Kerala	-	0.11%	0.24%
Madhya Pradesh	0.63%	1.07%	-

State	% of Revenue for Fiscal Year Ended FY24	% of Revenue for Fiscal Year Ended FY23	% of Revenue for Fiscal Year Ended FY22
Maharashtra	81.39%	79.04%	71.32%
Odisha	0.18%	-	0.62%
Rajasthan	1.30%	4.48%	5.88%
Tamil Nadu	0.03%	2.62%	9.21%
Uttar Pradesh	1.55%	1.31%	1.01%

Any decrease in revenue from Maharashtra, including due to increased competition or supply, or reduction in demand, or our inability to extend or renew subsisting contracts at commercially viable terms, may have an adverse effect on our business, cash flows, results of operation and financial condition. Further, any significant disruption, including due to social, political or economic factors or natural calamities or civil disruptions, impacting these geographical regions may adversely affect our business. Additionally, changes in the policies of the state or local governments of these regions may require us to change our business strategy. We cannot assure you that we will be able to address our reliance on these few geographical regions, in the future.

4. *We have a large workforce deployed across workplaces and customer premises. Consequently, we may be exposed to service-related claims and losses or employee disruptions, as well as employee related regulatory risks, that could have an adverse effect on our reputation, business, cash flows, results of operations and financial condition.*

Given the nature of our business, we have a large workforce. As of date of this May 31, 2024, we have employed 11,129 personnel. Out of our total employees, we have over 11,101 employees which are billable personnel and 128 are unbillable personnel on the payroll of the Company. Consequently, our ability to control the workplace environment in such circumstances is limited. The risks associated with the deployment of our personnel include possible claims relating to:

- actions or inactions of our personnel, including matters for which we may have to indemnify our customers;
- inappropriate behavior on part of our personnel, including sexual harassment of the employees at our customer locations;
- labor unrest, strikes, lockouts and other labor action;
- failure of our personnel to adequately perform their duties including rendering deficient services, shortage in shift, absenteeism, or lateness;
- violation by our personnel of security, privacy, health and safety regulations;
- any failure by us to adequately verify employee and personnel backgrounds and qualifications resulting in deficient services;
- employee errors, malicious acts by existing or former employees;
- damage to the customer's facilities or property due to the negligence of our employees;
- breach of confidentiality by existing or former employees; and
- criminal acts, torts or other negligent acts by our employees.

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact our reputation and brand name, which could impact the demand for our services. While there have been no such instances in the past, we cannot assure you that our reputation will not be severely damaged even by isolated incidents in the future, particularly if the incidents receive considerable adverse publicity or result in substantial litigation.

Additionally, we are subject to stringent labour legislations and regulations that protect the interests of workers, including legislations that set forth detailed procedures for dispute resolution and employee removal and impose certain financial obligations on employers upon retrenchment of employees, as well as laws and regulations relating to employee welfare and benefits such as minimum wage and maximum working hours, overtime, working conditions, non-discrimination, employee compensation, employee

insurance, bonus, gratuity, provident fund, leave benefits and other such employee benefits. These legislations require compliance, from time to time, which may among others, involve payments to be made depending upon their period of employment. Further, regulatory agencies in different states and courts in India may interpret compliance requirements differently, which may make compliance with laws and regulations more complex, time consuming and costly. If we fail to comply with labour welfare legislations, we may be exposed to fines and we may also face the risk of our licenses under applicable legislations being cancelled or suspended. For further details on the labour laws and other regulations applicable to us, see "**Key Regulations and Policies**" on page 129.

5. ***Our businesses are manpower intensive and our inability to attract and retain skilled manpower could have an adverse impact on our growth, business, and Financing condition. Further, in the event we are not able to manage our attrition, we may not be able to meet the expectations of our customers, which may have an adverse impact on our Financing condition.***

The business services we offer are manpower intensive and we hire a considerable number of personnel every year to sustain our growth. As of date of this Draft Red Herring Prospectus, we have employed 11,129 personnel. The cost of hiring and retaining our personnel affects our profitability, and is affected by a number of factors, including our ability to hire and assimilate new employees in the jurisdictions where we operate; our ability to manage attrition; our need to devote time and resources to training, professional development and other non-chargeable activities; and our ability to manage our workforce.

We cannot assure you that we will be able to meet our manpower requirements in the future or grow the number of our employees in a consistent manner. Our business operations and Financing performance may be adversely affected if we are unable to find sufficient personnel for our staffing and other businesses. In addition, we must continually evaluate and upgrade our recruiting and training programs to keep pace with changing customer needs and emerging technologies. We generally recruit new personnel to service new contracts, and while we usually undertake surveys to determine our ability to service our contracts, there is no assurance that qualified personnel shall be available to us in sufficient numbers and on terms of employment acceptable to us. We may not be able to effectively meet the expectations of our customers due to our failure to identify personnel with the requisite skills, experience or other attributes, and our training programs may not succeed in developing effective skills in a timely manner or at all.

Our average employee attrition ratio is 30% for the Financial Years ended March 31, 2022, 2023 and 2024. Higher attrition rates lead to an increase in our training and recruitment costs, which may have an adverse impact on our profitability and Financing condition. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for us to meet our future growth requirements. There can be no assurance that skilled manpower will continue to be available in sufficient numbers and at wages suitable to our requirements.

6. ***Our profitability and growth will be significantly dependant on our ability to maintain a lower debt equity ratio.***

As of May 31, 2024, the Company had a total outstanding indebtedness from banks and financial institutions amounting to ₹9813.29 lakhs. As on March 31, 2024, March 31, 2023 and March 31, 2022 our debt equity ratio was higher than 2. For details, see "**Basis of the Issue Price**" and "**Restated Financial Statement**" on page 85 and 161 respectively. Debt Equity ratio compares a company's total liabilities to its shareholder equity. A higher debt equity ratio highlights a company's dependence on borrowed funds. We have a higher debt equity ratio on a consolidated basis due to fact that our employee transportation business segment requires high capital investment (i.e. Investment in buses) which is financed through financial institutions. Further, our other segment of business is also working capital intensive and thus required high working capital limit which is financed through financial institutions. Our access to additional funds requires us to maintain various parameters including a healthy debt to equity ratio and a higher debt to equity ratio may affects our ability to raise funds at competitive costs. If we are unable to maintain a healthy debt equity ratio, we may be able to access funds at a higher interest rate which will ultimately affect our profitability. In addition, our borrowings require us to maintain certain financial ratios and certain other informative covenants. In the event the Company breach any financial or other covenants contained in any of our financing arrangements, the Company may be required to immediately repay our borrowings either in whole or in part, together with any related costs.

Our failure to meet to maintain a healthy debt equity ratio could have an adverse effect on our business, results of operations and financial condition. Further, high debt levels increase a Company leverage and high cost of interest which leads to financial risks.

7. *Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability*

A significant portion of our revenue comes from the top 5 (five) and 10 (ten) customers. The details of our revenue from such customers are as under:

Particulars	FY23-24	FY22-23	FY21-22	(₹ in Lakhs)
Top 5 customers	16,365.85	12573.69	10352.05	
Top 10 customers	24,429.10	21192.6	16050.02	
Top 5 customers (%)	46.05	38.15	43.86	
Top 10 customers (%)	68.74	64.30	68.01	

The loss of a significant client or clients would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, adversely impacting our income and financial condition.

8. *Our business could be adversely affected if our customers fail to renew their contracts with us or we fail to acquire new customers.*

We typically enter into short-term work orders/ contracts for one-year periods. Within the duration of these contracts, the scope of services can vary depending upon the requirements of our customers. Therefore, we need to seek new requirements or cross-sell our service offerings when our current services are completed or terminated with existing customers, and secure new customers in order to expand our business. Similarly, there is no assurance that customers availing our services will look to obtain further services from us or expand their relationship to avail our other offerings. Further, if our customers shift their business for the services we offer to our competitors, or if we are unsuccessful in retaining high renewal rates and favourable contract terms, our business, financial condition, cash flows and results of operations may be adversely affected. The loss or diminution in business from any of our major customers could have a material adverse effect on our revenue from operations. We may not be able to renew our contracts on favourable terms, or at all, or engage new customers in time to reduce the overall customer attrition rate, which could materially adversely affect our revenue and thus our results of operations.

To increase our revenue, we must continue to attract new customers. Our success will depend to a substantial extent on the widespread adoption of our offerings. Numerous factors may impede our ability to add new customers, including but not limited to, our failure to compete effectively against competitors, failure to attract qualified personnel and effectively train our personnel, failure to successfully innovate and deploy new services or failure to provide a quality customer experience and customer support.

9. *We may be unable to perform background verification procedures on our personnel as well as on our billable employees prior to placing them with our customers.*

We do ordinarily perform KYC background verification procedures on all our personnel prior to employing them or engaging them. While we undertake such checks where specifically requested by our customers, given the high volume of personnel that we employ each month, and sufficiently reliable information being unavailable in some cases, we may be unable to fully perform background verification procedures on each of our personnel. Further, there may be situations where the information provided may be false or incomplete, resulting in inaccurate background checks. Our inability to perform these

procedures fully could result in in sufficient vetting of our personnel, which could in turn result in an adverse effect on our reputation, cash flows, results of operations and business prospects if such personnel engaged in illegal or fraudulent activities during the course of their employment. Further, failure to perform such verification procedures (where applicable under the contract) does not typically result in monetary penalties by our customers but may lead to terminations of our personnel by our customers and replacements need to be provided

10. *We may be unable to fully realize the anticipated benefits of our past acquisitions and any future acquisitions or within our expected timeframe. If we are unable to identify expansion opportunities or experience delays or other problems in implementing our expansion efforts, our growth, business, cash flows, results of operations and financial condition may be adversely affected.*

We acquired 55% stake in Trimurti Utility Services Private Limited in 2018 to expand the Service Portfolio in Corporate Food Solution services and further addition of the customer in IFM and Staffing Service business segment and 66.67% stake in Everdew Engineering Private Limited in 2019 to expand the Service Portfolio in Production Support Service. For further details, see “**History and Certain Corporate Matters – Details regarding acquisition or divestment of business or undertakings**” on page 141.

We continue to focus on maintaining and enhancing our organic growth momentum, we also intend to further explore inorganic expansion by leveraging on the experience that we have gained through our prior acquisitions, with a particular focus on niche high-margin businesses. We have grown our business, geographical presence and our service portfolio over time, through strategic acquisitions in the past which have further enhanced our business operations, growth, margin profile and future prospects. We intend to pursue opportunities to undertake acquisitions (i) that allow us to enhance our scale and market position; (ii) that allow us to achieve operating leverage in key markets by unlocking potential efficiency and synergy benefits; (iii) that provide us with a platform to extend our reach to new geographic markets within India, particularly for hard service, Production Support Service and new geography; and (iv) that add new services complementary to our service offerings or that allow us to enter strategic businesses to capture additional revenue opportunities from our existing customer base to better our margin profile. To this end, we intend to utilise a portion of the proceeds of the Issue towards funding acquisitions. For details, see “**Objects of the Issue**” on page 80.

However, there is a possibility that we may not be able to identify suitable acquisition candidates or opportunities, negotiate attractive terms for such acquisitions, or expand, improve and augment our existing businesses. The number of attractive expansion opportunities may be limited, and attractive opportunities may command high valuations for which we may be unable to secure the necessary financing. The successful implementation of acquisitions depends on a range of factors, including funding arrangements, cultural compatibility and integration. There can be no assurance that such investments and acquisitions will achieve their anticipated benefits. If we are not able to successfully identify opportunities to build, acquire or expand our additional and existing integrated facilities management and allied businesses, or if we face difficulties in the process of developing, acquiring or expanding such operations, our business, cash flows, financial condition, results of operations and prospects may be materially and adversely affected. Acquisitions involve a significant number of risks, including, but not limited to, risks arising from change of control provisions in contracts of any acquired company, local law factors and risks associated with restructuring operations.

If we are unable to successfully overcome the potential difficulties associated with the integration process and achieve our objectives following an acquisition, the anticipated benefits and synergies of our recent or any future acquisitions may not be realized fully, or at all, or may take longer to realize than expected. Additionally, no assurance can be given that any businesses acquired will be profitable. Any failure to realize anticipated benefits in a timely manner could have an adverse effect on our business, results of operations, financial condition and cash flows.

11. *We had negative cash and cash equivalents generated during some of the previous years based on the restated consolidated financial statements of group as whole., which could in future may experience similar negative cash flows.*

The following table sets forth certain information relating to our cash flows for the periods indicated, based on the Restated Summary Statement of our Company:

Particulars	March 31, 2024	March 31, 2023	March 31, 2022
Net Cash from Operating Activity (A)	2442.84	507.74	421.38
Net Cash Used in Investing Activities (B)	(1636.61)	(2210.94)	(124.79)
Net Cash from Financing Activities (C)	(893.65)	1776.15	(523.06)
Net (decrease)/increase in Cash, Cash Equivalents and Bank Overdrafts (A+B+C)	(87.42)	72.95	(226.47)
Cash, cash equivalents and bank overdrafts at beginning of period	404.73	331.78	558.25
Cash, cash equivalents and bank overdrafts at end of period	317.31	404.73	331.78

We experienced negative cash flows used in investing activities in the Financial Years ended March 31, 2022, March 31, 2023, and March 31, 2024 primarily due to the purchase of property, plant and equipment including the capital work in progress. Further, we experienced negative cash flows used in financing activities in the Financial Year ended March 31, 2022, and Financial year ended March 31, 2024 primarily due to repayment of long term borrowings/short term borrowing (net) and Finance cost. We may experience negative cash flows in the future as well. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. This situation may have an adverse effect on our cash flows, business, future financial performance and results of operations.

12. *Significant disruptions of information technology systems or breaches of data security could adversely affect our business*

Technology has been an integral part of our business. We believe that technology is a huge enabler in driving speed, accuracy, efficiency, customer satisfaction, better service delivery and as a result, deriving revenue and profitability. Our Company as well as our Subsidiaries have adopted appropriate technology that not only helps them become more efficient and effective but also drive customer satisfaction and market competitiveness. Systems Applications and Products in Data Processing (“SAP”) is critical to our operations and we use it for financial record keeping, reporting, analytics and consolidation. Apart from SAP, we use various technology products to control every facet of our operations such as analytics and decision making, people management, workflow management, inventory management, among others. In terms of hardware, we have continuously optimised our hardware deployment which is today an on-site infrastructure. We have been especially mindful of cyber security, disaster recovery and business continuity planning with respect to technology.

We seek to protect our information systems and network infrastructure from physical break-ins as well as security breaches and other disruptive problems. However, there may be areas in the systems that have not been properly protected from security breaches and other attacks, as well as disruptions arising from physical disasters. Although we have not experienced any significant disruptions to our information technology systems in the past, we cannot assure you that we will not encounter disruptions in the future. While we have instituted a back-up management system to protect our information technology systems from such disruptions, any such disruption may result in the loss of key information and/or disruption of our business processes, which could adversely affect our business, cash flows, and results of operations.

In addition, our systems are potentially vulnerable to data security breaches, whether by employees or others that may expose sensitive data to unauthorized persons. Cybersecurity attacks are evolving and could lead to disruptions in systems, unauthorized release of confidential or otherwise protected information and corruption of data. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business, cash flows, reputation, results of operations and financial condition. Further, our business operations involve access by our personnel to customers' operational and

other confidential information, and our employees are required to securely handle and transmit confidential information about our customers. While there have been no past instances of disruption or breach of customer data, there can be no assurance that in the future we will not be subjected to claims relating to abuse of confidential information by our employees or proceedings related to intentional or unintentional exposure of our customers' confidential information

13. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, any failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations may adversely affect our operations*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous.

Additionally, we have applied and are in the process of applying for certain approvals, licenses, registrations and permits, which are necessary for us to continue our business and need to be updated pursuant to conversion from private to public Company. For instance, our Company has applied for Application made to the Sanand Nagarpalika, Gujarat for Professional Tax Registration Certificate for our Company's office situated in Gujarat; Application made to the Urban Development Department, Sanand Municipality for Shops and Establishment Registration Certificate for our Company's office situated in Gujarat; Application for Trade License bearing Application Number 0871791323 for its branch office situated at Mumbai and various other applications, which are currently pending before the relevant authorities.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which are, pending receipt or renewal, see "**Government and Other Statutory Approvals**" on page 232.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals which may result in the interruption of our operations and may have a material adverse effect on our business, financial condition, cash flows and results of operations. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, see "**Key Industry Regulations and Policies**" and "**Government and Other Statutory Approvals**" for permits/licenses required for the business on pages 129 and 232 respectively.

14. *We are dependent upon the business experience and skill of our promoters and management personnel. Loss of our senior management or our inability to attract or retain such qualified personnel, could adversely affect our business, results of operations and financial condition.*

We believe that our management team plays a key role in the development of our business and we benefit from their industry knowledge and expertise, vision and leadership. We believe the stability of our management team and the industry experience brought on by our individual Promoters and Directors enables us to continue to take advantage of future market opportunities. We believe that our management team is well qualified to leverage our market position with their collective experience and knowledge in the industry, to execute our business strategies and drive our future growth.

Our ability to meet continued success and future business challenges depends on our ability to attract,

recruit and retain experienced, talented and skilled professionals. The loss of the services of our key personnel or our inability to recruit or train sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. If we are unable to hire additional qualified personnel or retain our existing qualified personnel, our ability to expand our business may be impacted. Our Company's profitability, financial condition and results of operations may also be impacted due to lack of experienced and talented workforce.

15. *We do not own some of the business premises where our Branch offices are located.*

Our premises in which our Registered Office is situated are owned by us. However, some of the premises used by our Company for our business purposes such as our Branches Offices located at Pritampura, Madhya Pradesh and Sanand, Gujarat. For more details on properties taken on lease by our Company, see "**Our Business**" on page 111. If any such lease/rent agreements under which we occupy the premises are not renewed on terms and conditions that are favorable to us, or at all, we may suffer a disruption in our operations which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on our operations. While we have not experienced any issue in renewing the lease arrangement in the past, there can be no assurance that renewal of lease/rent agreements with the owner will be entered into. In the event of non-renewal of lease/rent arrangements, we may be required to shift our business premises to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one. Further, the lease agreements entered by our Company may be inadequately stamped or not duly registered. Unless such documents are adequately stamped or duly registered, such documents may be rendered inadmissible as evidence in a court in India under applicable law or may impact our ability to enforce these agreements legally, which may result in an adverse effect on the continuance of our operations and business.

16. *Sufficient working capital is essential to ensure the seamless daily operation of our business. If, for any reason, there is a disruption or we encounter difficulties in obtaining the necessary working capital in a timely manner and under favourable terms, it could potentially have a detrimental impact on our operational efficiency, profitability, and prospects for growth*

As on March 31, 2024, the outstanding amount under the working capital facilities of our Company was ₹2,627.06 Lacs. We operate in a working capital-intensive industry therefore our business demands substantial funds towards working capital requirements. In light of the increasing business and the new order from customer, we require working capital for Payment of Salary, Fuel Cost and Raw Material before payment is received from customers. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, see chapter titled "**Object of the Issue**" beginning on page 80.

17. *The industries in which we operate are intensely competitive and have low barriers to entry.*

As an integrated business services company providing a wide range of business services including integrated facility management services and other Support service. We compete with a range of organized and unorganized competitors, depending on the nature and location of services provided. Further, the industries in which we operate comprise a number of very fragmented and competitive markets, particularly at the local level, with smaller operators competing for local contracts. There is intense pricing competition from private business services agencies which operate at the local level and provide one or more of the services we do, which may be preferred by certain customers, due to factors such as better pricing and local relationships. As a result, our competitors may have greater financial, technical and marketing resources available to them than our businesses that compete against them. We also face the risk of our current or prospective customers deciding to utilize their internal workforce or use independent contractors or service providers in the unorganized segment to manage their facilities.

Our continued success depends on our ability to compete effectively against our existing and future competitors. We expect that the level of competition will remain high, which could directly impact the size of our workforce and therefore potentially limit our ability to maintain or increase our market share or profitability. Our competitors may succeed in rendering services more effectively and economically than us, which may make our services uncompetitive and adversely affect our business, cash flows, results of operations and financial condition. Enhanced competitive presence could manifest itself in various ways such as pricing pressure, increased competition for customer acquisition and retention, competitive product and service offerings with enhanced features and also competitive pressure on talent acquisition and retention thereby leading to enhanced costs.

18. We have certain contingent liabilities, and our Financing condition and profitability may be adversely affected if any of these contingent liabilities materialize.

As of March 31, 2024, our contingent liabilities as indicated in our Restated Financing Statements were as follows:

Particulars	March 31, 2024	March 31, 2023	March 31, 2022	(Rs In Lakhs)
Contingent liabilities and commitments (to the extent not provided for)				
(a) Performance Bank Guarantees issued by the company	94.06	430.13	922.12	
(b) Disputed statutory levies (Maharashtra VAT, TDS, GST)	44.33	51.31	58.14	
(c) Disputed Statutory Levies (Provident Fund)	150.71	-	-	
Total	289.10	481.44	980.26	

If any of these contingent liabilities materialize, our results of operations and Financing condition may be adversely affected.

19. We are subject to risks associated with our contracts, including our ability to correctly assess pricing terms, employee costs and other financial obligations, the increased complexity of our contracts and the potential early termination or change of scope of contracts by clients.

We negotiate pricing terms for a particular contract. Our pricing is dependent on our internal forecasts, which may be based on limited data and could prove to be inaccurate. If we do not accurately estimate the costs, such contracts could prove unprofitable for us or yield lower profit margins than anticipated. There is a risk that we will underprice our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, delays or failures to achieve anticipated cost savings, or unexpected risks we encounter in connection with the performance of such contracts, including those caused by factors outside our control, or any failure to complete our contractual obligations at the committed service levels could adversely affect our revenue and profitability.

20. We may not be able to successfully manage the growth of our operations and execute our growth strategies which may have an adverse effect on our business, financial condition, results of operations and future prospects.

As we continue to grow, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and implement an effective information technology and management system. In order to fund our ongoing operations and future growth, we need to have sufficient internal sources of liquidity or access to additional financing from external sources, including debt or equity. Further, we will be required to manage relationships with a greater number of clients, distributors, lenders and other third parties. We will need to further strengthen our internal control and compliance functions to ensure that we will be able to comply with our legal and contractual obligations and minimize our operational and compliance risks. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business and

operations and training an increasing number of personnel to manage and operate the expanded business. There can be no assurance that we will be able to successfully manage our growth, strategies or that our expansion plans will not adversely affect our existing operations and thereby have an adverse effect on our business, financial condition, results of operations and prospects.

21. *There are certain instances of delays in payment of statutory dues. Any delay in payment of statutory dues or non-payment of statutory dues in dispute may attract financial penalties from the respective government authorities, which may have an adverse impact on our financial condition and cash flows.*

There have been certain instances on delay in payment of statutory dues in last three FYs fiscals, which inter-alia include, goods and services tax, provident fund, employees' state insurance,, which as on the date of this Draft Red Herring Prospectus has been deposited with relevant authorities. There can be no assurance that such delays may not arise in future. This may lead to financial penalties from respective government authorities which may have a material adverse impact on our financial condition and cash flows.

22. *We have in past entered into related party transactions and we may continue to do so in the future*

As of March 31, 2024, we have entered into several related party transactions with our related parties including our Directors. In addition, we have in the past also entered into transactions with other related parties. We confirm that the transactions with Related Parties entered into by our Company in the preceding three years have been carried out at arms' length price and are in compliance with the Companies Act 2013 and the applicable laws. Further, we confirm that the transactions are not prejudicial

to the interest of our Company. A summary of the related party transactions during the Financial Year 2024, 2023 and 2022 as per applicable Ind GAAP is derived from our Restated Financial Statements. For further details, see "**Restated Financial Information**" on page 166.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

23. *We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights*

As on date of this Draft Red Herring Prospectus, we have registered the trademark " " under classes 35 and 37 bearing Trademark number 2549198 and 2549199. For further details, see "**Government and Other Statutory Approvals**" on page 232. We cannot assure you that we will be able to obtain renewal against the application made. If we are unable to renew or register our trademarks for various reasons including our inability to remove objections to any trademark application, or if any of our unregistered trademark are registered in favour of or used by a third party in India or abroad, we may not be able to claim registered ownership of such trademark and consequently, we may not be able to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities, causing damage to our business prospects, reputation and goodwill in India and abroad. Apart from this, any failure to register or renew registration of our registered trademark may affect our right to use such trademark in future. Further, our efforts to protect our intellectual property in India and abroad may not be adequate and any third-party claim on any of our unprotected intellectual property may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered brand name in India and abroad which has been registered by us in India. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks in India and abroad.

24. *We have not obtained credit ratings and may not be able to access capital to finance our operations and future growth of our business, which could have a material adverse effect on our business, results of operations, financial condition, cash flows, and future prospects.*

The cost and availability of capital, among other factors, depends on our credit rating. We have not received any credit ratings, as of the date of this Draft Red Herring Prospectus. Credit ratings typically reflect, amongst other things, the rating agency's opinion of the financial strength, operating performance, strategic position, and ability to meet obligations of a company. The non-availability of credit ratings may increase borrowing costs and constrain our access to capital and lending markets and, as a result, could adversely affect our business and results of operations. In addition, non-availability of credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements.

25. *We propose to utilize the Net Proceeds to undertake inorganic growth for which the target may not be identified. If Net Proceeds to be utilized towards funding strategic acquisitions and investment are insufficient for the cost of our proposed acquisitions and other strategic initiative, we may have to seek alternative forms of funding.*

We propose to utilise a certain portion of the Net Proceeds towards funding strategic acquisitions and investment as set forth in "**Objects of the Issue**" on page 80. As on the date of this Draft Red Herring Prospectus, we have not identified any potential target for investment or acquisition or entered into any definitive agreements towards any future acquisitions or strategic initiatives. It is also possible that we may not be able to identify suitable targets, or that if we do identify suitable targets, we may not be able to complete those transactions on terms commercially acceptable to us or at all and/or be able to complete all aspects of the acquisition process and/or receive relevant regulatory clearances (as applicable) in a timely manner or at all. The inability to identify suitable targets or investments and the inability to

complete such transactions may adversely affect our competitiveness and growth prospects. Further, we will from time to time continue to seek attractive inorganic opportunities that will fit well with our strategic business objectives and growth strategies, and the amount of Net Proceeds to be used for acquisitions will be based on our management's decision. The amounts deployed towards such initiatives may not be the total value or cost of such acquisitions or investments, resulting in a shortfall in raising requisite capital from the Net Proceeds towards such acquisitions or investments. Consequently, we may be required to explore a range of options to raise requisite capital, including internal accruals or debt financing from third party lenders or institutions.

26. *Our management will have broad discretion in how we apply the Net Proceeds, including interim use of the Net Proceeds, and there is no assurance that the objects of the Issue will be achieved within the time frame expected or at all, or that the deployment of the Net Proceeds in the manner intended by us will result in any increase in the value of your investment.*

We intend to use Net Proceeds from the Issue towards; (i) funding the working capital requirements of the company; (ii) pursuing inorganic growth initiatives; and (iii) general corporate purposes. For details of the objects of the Issue, see "**Objects of the Issue**" on page 80. Our management will have broad discretion to use the Net Proceeds, and investors will be relying on the judgment of our management regarding the application of the Net Proceeds. Moreover, we cannot undertake any material deviation in the utilisation of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. Our Company may have to revise its management estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in its business.

27. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.*

We propose to utilize the Net Proceeds as stated under "**Objects of the Issue**" on page 80. However, our funding requirements and the deployment of Net Proceeds are based on management estimates and have not been independently appraised.

As per section 27 of the Companies Act, the objects of utilization of the Net Proceeds from the fresh issue as disclosed in this Draft Red Herring Prospectus can only be varied after obtaining the shareholders' approval vide a special resolution. In the event, the Company wishes to vary the objects for which the net proceeds from the fresh issue are required to be varied, our Company may not be able to obtain the Shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders' approval may adversely affect our business or operations. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our ability to respond to any change in our business or financial condition, and thus, adversely affecting our business and results of operations.

Further, our Promoters would be required to provide an exit opportunity to Shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter our Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI. In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in the Draft Red Herring Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

28. *We may be affected by competition law, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002 (“**Competition Act**”) seeks to prevent business practices that have an Appreciable Adverse Effect on Competition (“**AAEC**”) in the relevant market in India. Under the Competition Act, any arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an AAEC in India is void and attracts substantial monetary penalties. The Competition Act also prohibits abuse of a dominant position by any enterprise. The combination regulation (merger control) provisions under the Competition Act require that the acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by CCI. However, the applicability or impact of the provisions of the Competition Act on any future acquisition or arrangement entered into by us cannot be predicted with certainty at this stage.

29. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “**Dividend Policy**” on page 165.

30. *The average cost of acquisition of Equity Shares by our Promoter could be lower than the Issue Price.*

Our Promoter’s average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares by our Promoter in our Company, please refer to the chapters “**Capital Structure**” beginning on page 70.

31. *Our financing agreements contain covenants that limit our flexibility in operating our business. Our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business, cash flows, results of operations and financial condition.*

As of March 31, 2024, we had secured long term borrowings aggregating to ₹4351.74 lacs and short-term borrowings aggregating to ₹2,627.06 lacs and our long-term debt-to-equity ratio was 1.73 times. In addition, we may incur additional indebtedness in the future. Our indebtedness could have several important consequences, including but not limited to the following:

- A portion of our cash flow may be used towards repayment of our existing debt, which will reduce the availability of our cash flow to fund working capital, capital expenditures, acquisitions, and other general corporate requirements.
- our ability to obtain additional financing in the future at reasonable terms may be affected.
- fluctuations in market interest rates may affect the cost of our borrowings, as some of our indebtedness are at variable interest rates.
- there could be a material adverse effect on our business, Financing condition, and results of operations if we are unable to service our indebtedness or otherwise comply with Financing and other covenants specified in the financing agreements; and

Most of our financing arrangements are secured by our movable and immovable assets. Many of our financing agreements also include various conditions and covenants that require us to obtain lender consents prior to carrying out certain activities and entering into certain transactions. Failure to meet these conditions or obtain these consents could have significant consequences on our business and

operations. Specifically, we require, and may be unable to obtain, lender consents to make any change to our share capital; effect any scheme of amalgamation or reconstruction; implement a new scheme of expansion or take up an allied line of business; enlarge the scope of our trading activities; dispose the whole or substantially the whole of any undertaking; to commit, omit any act, deed or thing whatsoever as to incur winding up or liquidation process; invest any funds by way of deposits and loans in the share capital of other company; declare dividend if any instalments towards principal or interest remains unpaid; and dilution of capital or sale of fixed assets.

32. *Our Promoters will continue jointly to retain majority control over our Company even after the Issue which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoters will collectively own [●] % of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

33. *One of the subsidiary have incurred losses in one of the last three years.*

Our Subsidiary Company, Ialpha Mobility Solutions Private limited, commenced commercial operations with effect from March 26, 2021 and had incurred losses in 2022-23 as mentioned below:

Subsidiary Company Name	Losses for FY 2022-23
Ialpha Mobility Solutions Private limited*	(1.25) lakhs

As on date of this Draft Red Herring Prospectus, Ialpha Mobility Solutions Private Limited is not carrying any business.

34. *Changes in existing emission and vehicle age norms may lead to part or all of our fleet of vehicles becoming un-roadworthy.*

Any change in the existing norms for vehicle emissions and age of vehicles, including implementation of more stringent Bharat Stage VI emission norms or a restriction on the use of commercial vehicles above the age of certain years, including pursuant to judicial rulings, revised legislations and international treaties, such as the United Nations Framework Convention on Climate Change, to which India is a signatory, may require us to comply with such stringent norms. While currently, there is no bar on the plying of vehicles compliant with earlier Bharat Stage emission norms, such as Bharat Stage III or Bharat Stage IV emission norms, implementation of higher norms, may lead to some or all of our fleet of vehicles being declared not road-worthy. Further, failure to meet such higher emission norms may also result in some or all of our vehicles becoming declared not road-worthy. There can be no assurance that our vehicles will be able to meet such emission compliance norms partially or at all. Failure to meet such emission norms may cause us to incur substantial costs in replacement and upgrading of our fleet of vehicle, which may have a material adverse effect on our business and results of operations.

35. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our Financing risks.*

Our management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by it while taking into account the essential components of internal control stated in the Guidance Note on Audit of Internal Financing Controls over Financing Reporting issued by the Institute of Chartered Accountants of India. These responsibilities

include the design, implementation and maintenance of adequate internal Financing controls to ensure the orderly and efficient conduct of our business, including adherence to our policies, the safeguarding of our assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable Financing information, as required under the Companies Act, 2013.

Effective internal controls are necessary for us to prepare reliable Financing reports and effectively avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. While we have taken measures to strengthen our internal control system and have conducted audits to review gaps and process weaknesses and implemented the suggested measures, there can be no assurance that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may adversely impact our ability to accurately report, or successfully manage, our Financing risks, and to avoid fraud.

36. *SCM business has contributing 6.04% of Revenue which have one major customer. The loss of our major customer would have a material adverse effect on our business, cash flows, results of operations and Financing condition.*

The substantial portion of our profits and revenue of SCM business has been dependent upon one of the major customer. Our revenue for this segment has increased from ₹1525.31 lakh in Financing Year 2021-2022 to ₹2147.46 lakh in Financing Year 2023-2024. We have not entered into long term agreements with our customer and the success of our business is significantly dependent on maintaining good relationships with them. The loss of this customer or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, Financing condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customer or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their business need either by themselves or through our competitors, which could reduce our sales and adversely affect our business, cash flows, results of operations and Financing condition.

37. *Our Company, our Subsidiaries, our Group Companies, our Promoters and Directors may be parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition*

Our Company, our Subsidiaries, our Group Companies our Promoters and Directors are party to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and legal forums. A summary of outstanding litigation proceedings involving our Company, Subsidiaries, our Promoters, and our Directors, as on the date of this Draft Red Herring Prospectus as disclosed in “**Outstanding Litigations and Material Developments**” on page 225, in terms of the SEBI ICDR Regulations and the Materiality Policy is provided below:

Any litigation involving Company may divert the attention of our management and Promoters and consume our corporate resources and we may incur significant expenses in such proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such litigation are decided against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares.

Furthermore, we may not be able to quantify all the claims in which we are involved. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure that similar proceedings will not be initiated in the future. This could adversely affect our business, cash flows, financial condition, and results of operation. For further details, pertaining to material pending outstanding litigations involving our Company, our Subsidiary, our Group Companies, our Promoters and Directors, see "***Outstanding Litigations and Material Developments***" on page 225.

38. *Our Company may incur penalties or liabilities for delayed compliance with certain provisions of the RBI under FEMA Act.*

Our Company has in the past made an investment in one of the Dubai based company i.e. Unique Suprem Facilities Management LLC, which became our associates upon investment. Due to Covid impact on the business, there was no business in associates which leads to closure of the associates. As there is no transaction in associates so our Company does not have requisite financial papers of Associates which leads to non-filling of APR as the Financial papers are prerequisite for APR filling. Our company has applied for closure of the associates which is pending for the order, once closure order received our company will file the APR. The delay of filling of APR may lead to maximum penalty of ₹50,000.

39. *We are dependent on our vendors for the supply of equipment and products that we use in providing our services and solutions.*

We do not have any manufacturing facilities and procure our products and equipment, such as safety and cleaning equipment, spares and consumables, from various vendors or OEMs for the various services and solutions that we offer. We are therefore dependant on third parties for the manufacture of such products and equipment, and maintenance of adequate inventory to ensure that we are able to procure such products and equipment based on supply necessities. The operations of our vendors are subject to various operating risks, including some which are beyond their control, which may include breakdowns and failure of equipment, industrial accidents, employee unrest, import duties, the outbreak of infectious diseases such as COVID-19, natural disasters, among others. We may face delays in procurement and added costs as a result of the time required to on-board new vendors to undertake manufacturing in accordance with our standard processes and quality control standards. Further, we may also be exposed to fluctuations in the prices of these products and equipment and as consequence, may be unable to control the factors affecting the price at which we procure these materials. Upward fluctuations in the prices of such materials may thereby affect our margins and profitability, resulting in a material adverse effect on our business, cash flows, financial condition and results of operations.

While we strive to have adequate back-up arrangements in place to ensure adequate capacity and sourcing, we cannot assure you that we will always be able to arrange for alternate sources, at prices acceptable to us, or at all, or that we will be able to pass on any increase in cost to our customers. Any inability on our part to arrange for alternate vendors, on commercially acceptable terms, may have an adverse effect on our business, cash flows, results of operations and financial condition.

40. *Our Promoters have extended personal guarantees or co-borrowers in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will continue to be provided by our Promoters in the future.*

Some of our Promoters have provided personal guarantees in connection with certain of our financing arrangements. For further information, see “**Financing Indebtedness**” on page 208. There can be no assurance that our Promoters will continue to provide such personal guarantees for our debt facilities in the future or that our lenders will continue to extend our current or comparable financing arrangements in the absence of such personal guarantees from our Promoters. Our ability to service our debt obligations will depend entirely on the cash flow generated by our business in the future. In addition, in the event that any personal guarantees provided by our Promoters are invoked and the Promoters are not able to meet their guarantee requirements, then legal proceedings may be initiated against them and they may not be able to effectively manage the operations of our Company.

41. *Our insurance coverage may not be sufficient or may not adequately protect us against all material hazards, which may adversely affect our business, cash flows, results of operations and financial condition.*

While we believe that the level of insurance we maintain is appropriate for the risks of our business, notwithstanding the insurance coverage that we carry, we may not be fully insured against certain business risks. There are many events that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured. Our insurance policies contain exclusions and limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under the said insurance policies. Additionally, there may be various other risks and losses for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that we will be able to maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable in the future. The occurrence of an event for which we are not insured, where the loss is in excess of insured limits occurs or where we are unable to successfully assert insurance claims from losses, could result in uninsured liabilities. Further, despite such uninsured losses we may remain obligated for any financial indebtedness or other obligations related to our business. Additionally, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business, financial condition, cash flows

and results of operations could be adversely affected.

42. *We have significant employee benefit expenses, such as workers' compensation, staff welfare expenses and contribution to provident and other funds. An increase in employee costs in India may prevent us from maintaining our competitive advantage and may reduce our profitability.*

We incur various employee benefit expenses, including worker's compensation, staff welfare expenses and contribution to provident and other funds. Worker's compensation costs may increase in the future if states raise benefit levels and liberalize allowable claims. Our profit margins may get adversely impacted, if we are unable to pass on such costs and cost increases to our clients on a concurrent basis. Unless we are able to continue to increase the efficiency and productivity of our employees, increase in proportion employees with lower experience, or source talent from other low-cost sources, employee costs increase in the long term may reduce our profit margins.

43. *Our Promoters, Directors and Key Managerial Personnel of our Company may have interests in us other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters are interested in us to the extent of any transactions entered into or their respective shareholding and dividend entitlement in us. Our Directors are also interested in us to the extent of remuneration paid to them for services rendered as our Directors and reimbursement of expenses payable to them. Our Directors may also be interested to the extent of any transaction entered into by us with any other company or firm in which they are directors or partners or in their individual capacity. For further details, see "**Our Promoters and Promoter Group**" and "**Our Management**" on page 159 and 145 respectively.

ISSUE SPECIFIC RISKS

44. *Subsequent to the listing of the Equity Shares, we may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges in order to enhance the integrity of the market and safeguard the interest of investors*

Subsequent to the listing of the Equity Shares, we may be subject to Additional Surveillance Measures ("ASM") and Graded Surveillance Measures ("GSM") by the Stock Exchanges and the Securities and Exchange Board of India. These measures have been introduced to enhance the integrity of the market and safeguard the interest of investors. The criteria for shortlisting any security trading on the Stock Exchanges for ASM is based on objective criteria, which includes market-based parameters such as high low-price variation, concentration of client accounts, close to close price variation, market capitalization, average daily trading volume and its change, and average delivery percentage, among others. A scrip is subject to GSM when the share price is not commensurate with the financial health and fundamentals of the company. Specific parameters for GSM include net worth, net fixed assets, PE, market capitalization and price to book value, among others. Factors within and beyond our control may lead to our securities being subject to GSM or ASM. In the event our Equity Shares are subject to such surveillance measures implemented by SEBI and the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

45. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book-building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market

price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

46. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares will be determined by the book-building method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. For details, see “**Basis for Issue Price**” on page 88. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

47. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. Any sale of our Equity Shares by our Promoters or major shareholders or future equity issuances, by us may adversely affect the trading price of our Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

48. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

49. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

50. *QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within 3 Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS:

51. *Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.*

As we derive majority of our revenue from export sales, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax including antidumping duties and countervailing duties, trade, and monetary policies; occurrence of natural or man- made disasters; downgrade in debt rating; and adverse global economic conditions due to various reasons such as, effect of COVID Pandemic, ongoing dispute between Russia and Ukraine etc. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

52. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operations, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

53. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

Under the Companies Act, 2013, a company having share capital and incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of our Equity Shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted

54. *Investors may not be able to enforce judgments obtained in foreign courts against us.*

We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, which includes the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the “Civil Code”). The Civil Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment. It is unlikely that an Indian court would award damages on the same basis or to the same extent as was awarded in a final judgment rendered by a court in another jurisdiction if the Indian court believed that the amount of damages awarded was excessive or inconsistent with public policy in India. In addition, any person seeking to enforce a foreign judgment in India is required to obtain prior approval of the Reserve Bank of India to repatriate any amount recovered pursuant to the execution of the judgment.

55. *We are a public limited company under the laws of India. All of our directors and officers are Indian nationals and all or a significant portion of the assets of all of the directors and officers and a substantial portion of our assets are located in India. As a result, it may be difficult for investors to effect service of process outside India on us or on such directors or officers or to enforce judgments against them obtained from courts outside India, including judgments predicated on the civil liability provisions of the United States federal securities laws. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the industry in which we operate, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, and our business, prospects, financial condition and results of operations, in particular.

56. *We are subject to regulatory, economic and social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on the Emerge platform of NSE, subject to the receipt of the final listing and trading approvals from the NSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- political instability, terrorism, military conflict, epidemic or public health issues in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Instability in financial markets and volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- changes in India's tax, trade, fiscal or monetary policies; and
- other significant regulatory or economic developments in or affecting India or its logistics sector.

Moreover, a fall in the purchasing power of our customers, for any reason whatsoever, including rising consumer inflation, availability of financing to our customers, changing governmental policies and a slowdown in economic growth may have an adverse effect on our customers' revenues, savings and could in turn negatively affect their demand for our products. In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

57. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Continued high rates of inflation may increase our expenses related to costs of raw material, rent, salaries or wages payable to our employees or any other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

58. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

59. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

60. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

61. *The occurrence of natural or man-made disasters may adversely affect our business, financial condition, results of operations and cash flows.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and man-made disasters, including acts of war such as Russia's invasion of Ukraine, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the

COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

62. *Our ability to raise foreign capital may be constrained by Indian law.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

63. *Rights of shareholders under Indian laws may be different from laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as our shareholder than as a shareholder of an entity in another jurisdiction.

2. Inorganic Growth –

We intend to use ₹ 750.00 Lakh of the Net Proceeds to pursue inorganic initiatives focused towards expansion of our operations. One of our core strategies is to pursue inorganic growth through strategic acquisitions of high margin businesses supplemental to our operations. In line with our past practice, we intend to pursue similar opportunities to undertake acquisitions (i) that allow us to enhance our scale and market position; (ii) that allow us to achieve operating leverage in key markets by unlocking potential efficiency and synergy benefits; (iii) that provide us with a platform to extend our reach to new geographic markets within India and selected overseas markets; and (iv) that add new services

complementary to our service offerings or that allow us to enter strategic businesses to capture additional revenue opportunities from our existing customer base to improve our margin profile.

We believe that we have benefited significantly from the acquisitions undertaken by us in the past and each of our acquisition are added new service portfolio or straightening of our existing service portfolio with better margin.

Rationale for acquisitions in future

Some of the selection criteria that we may consider when evaluating strategic acquisitions include:

- expertise in the domain we operate in or wish to expand into;
- strategic fit with our existing business such that the businesses are synergistic with some of our existing businesses/customers or where we can look to leverage some of our existing experience, expertise or relationships, amongst other competencies;
- new customers / users that we can serve with our existing capabilities;
- newer service offerings as well as improvement of our service and customer mix such that our overall margin profile improves;
 - enhance our geographical reach;
 - strengthen market share in existing markets; and
- identification of a strong management team run by experienced promoters who then continue to work with us to not only build their original businesses but add value to the overall organization;
- acquisition price which we evaluate very carefully as we do not believe in overpaying for any acquisition; and
- asset light acquisitions, where the core asset are the people and their expertise coupled with processes and technology.

Our acquisition strategy is primarily driven by our Board and the typical framework and process followed by us for acquisitions involves identifying the strategic acquisitions based on the rationale set out above, entering into requisite non-disclosure agreements and conducting diligence of the target. Once we have satisfactorily concluded the diligence exercise, we enter into definitive agreements to acquire the target based on the approval of our Board and the shareholders, if required.

We will from time to time undertake potential acquisitions and/or investments in line with our business objectives and overall expansion strategies, with a view to augment our growth by acquiring companies.

The amount of Net Proceeds to be used for each individual acquisition and/or investments will be based on our Management's decision and may not be the total value or cost of any such investments, but is expected to provide us with sufficient financial leverage to pursue such investments. The actual deployment of funds will also depend on a number of factors, including the timing, nature, size and number of acquisitions undertaken in a particular period, as well as general factors affecting our results of operation, financial condition and access to capital. GLOBAL ECONOMIC OVERVIEW

The global economy is going through a slow down on account of multiple shocks. After recovering from the pandemic- induced downfall, the global economy has lost momentum on account of Russia-Ukraine war and other factors, which is slowing down growth and broadening inflationary pressures. As per International Monetary Fund (IMF) World Economic Outlook (WEO), October 2022, the global economy is experiencing a number of turbulent challenges, and the future of global economy rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply-side disruptions. IMF has projected global growth to decline from 6.0 per cent in 2021 to 3.2 per cent in 2022 and 2.7 per cent in 2023.

The multiple shocks being faced by the global economy is affecting various regions/countries to different degrees via impacts on global trade and output. IMF's October 2022 projections show the aggregate output of the Advanced Economies (AEs) to grow by 2.4 per cent in 2022 and 1.1 per cent in 2023, as compared to 5.2 per cent in 2021. In contrast, the aggregate output of Emerging Market and Developing Economies (EMDEs) is expected to grow by 3.7 per cent in both 2022 and 2023, as compared to 6.6 per cent in 2021.

As per further update from IMF on World Economic Outlook, Global Growth is projected to fall from and estimated 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upwards.

INDIAN ECONOMIC OVERVIEW INTRODUCTION

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronized policy rate hikes to curb inflation. The rate hike by the US Fed drove capital into the US markets causing the US Dollar to appreciate against most currencies. This led to the widening of the Current Account Deficits (CAD) and increased inflationary pressures in net importing economies. The rate hike and persistent inflation also led to a lowering of the global growth forecasts for 2022 and 2023 by the IMF in its October 2022 update of the World Economic Outlook. The frailties of the Chinese economy further contributed to weakening the growth forecasts. Slowing global growth apart from monetary tightening may also lead to a financial contagion emanating from the advanced economies where the debt of the non-financial sector has risen the most since the global financial crisis. With inflation persisting in the advanced economies and the central banks hinting at further rate hikes, downside risks to the global economic outlook appear elevated. The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year. Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth.

Integrated Facilities Management Industry

Global Facility Management Market Overview:

The global Facility Management (FM) market is witnessing a major transformation driven by technology innovation, new business models, emerging value propositions, competitive disruption, and new service offerings as value propositions are shifting to service outcomes, user experience, and business productivity.

Outsourcing is evolving rapidly across the world; in the past decade, the main objective of outsourcing was cost optimization but today organizations want to outsource FM services to free-up internal resources to deliver strategic value.

Outsourced FM Market Revenue Trend, Global, 2018 – 2028

Asia is the largest FM market and is highly diverse. While Australia, the most developed market in the region for both FM and IFM, has reached some degree of maturity, other markets, including China and India, are still in a

stage of infancy and will grow steadily and become more competitive. The low penetration of FM services markets in many of-growing economies indicates that immense potential exists for market participants to grow and develop, as outsourcing becomes more commonplace in the next 10 years.

Indian IFM Market Analysis:

IFM market in India has been growing steadily over the last decade and is set to witness significant growth momentum over the next 5 years. According to industry reports, the market was valued at around INR 90 Thousand Crores in 2023 and is expected to reach 190 Thousand Crores by 2029, growing at a compound annual growth rate (CAGR) of approximately 36.12%. In India out of the Facility Market 39% of the business are in Outsourced model to Third party facility Management Companies.

The facility management market in India has been growing significantly in recent years. Facility management refers to the professional management of facilities such as manufacturing Hubs, office buildings, shopping malls, hospitals, hotels, airports, and educational institutions to ensure their efficient operation and maintenance. In India 39% of the business are in Outsourced model to Third party facility Management Companies in 2023 which will increase as there is increase in the Demand for IFM Services to 50% by 2029.

The demand for IFM services has increased as people's preferences for a safe, clean, and secure environment have grown. The Government plan to develop 100+ Smart Cities will result in a surge in Infrastructure creations. Given the current expansion and increase in investments in IT, Manufacturing, IteS and BFSI segments, the demand for professional IFM services is increasing, IT sector is shifting to more personalized/ customized services utilizing both Hard and Soft FM services. Investments in other segments such as healthcare and retail are also propelling the demand for IFM services.

Outsourced IFM Market:

The market is now shifting from single service contract model to integrated services model which is a method of consolidating all service under one contract and management team. The Intend is to streamline communication and make day-to-day operations easier to manage while improving the performance.

IFM services can be broadly classified and defined as below:

- Soft Services: This includes Housekeeping/ cleaning/ janitorial, Disinfection & Sanitation, Landscaping & Gardening and Pest control services. More than one or all the services are combined in a Soft Services contract.
- Hard Services/ Engineering Services: Heating Ventilation and Air Conditioning (HVAC) maintenance, fire safety systems, Mechanical, Electrical, Plumbing (MEP) maintenance and Green Building Services (energy management, waste management etc.) and other services such as lighting systems.

Drivers of Growth:

- a) Infrastructure Development: The Indian government's focus on infrastructure development, including the construction of smart cities, airports, metro systems, and industrial parks, has fueled the demand for facility management services.
- b) Increasing Outsourcing Trend: Many organizations are outsourcing their facility management functions to specialized service providers to reduce costs, enhance operational efficiency, and focus on their core business activities.
- c) Industrialization: Growth in exports, import substitution, increasing internal demand and penetration of contract manufacturing are driving industrialization in India. Several government initiatives are supporting the growth of industrial segment in India. Major ones are:
 - *Production Linked Incentives (PLI) Schemes*: This was announced in March 2020 and later updated in November 2020 to create national manufacturing champions.
 - *Industry 4.0*: This refers to implementing big data, robotics, the internet of things (IoT), artificial intelligence, machine learning and cloud services for industrial operations. India is at a nascent stage in the adoption of Industry 4.0 and has higher growth potential in India, supported by the industrial and digital initiatives by the government.
 - *China Plus One Strategy*: This refers to the diversification of supply chains from China. The recent global pandemic brought supply chain disruptions and the Ukraine-Russia war has

exacerbated it. So, the global companies are looking beyond China for supply chains. India, with its cost competitiveness could benefit from this strategy and develop its manufacturing sector.

- d) Rise in Real Estate Sector: The growth of the real estate sector, including commercial and residential properties, has contributed to the demand for facility management services to ensure proper maintenance and operational efficiency.
- e) Technological Advancements: The adoption of advanced technologies such as Internet of Things (IoT), building automation systems, energy management solutions, and predictive maintenance tools has improved the efficiency of facility management operations.
- f) Consolidation & Merger and Acquisitions:
 - Organized players are gaining more popularity in terms of adding more service activities through mergers or tie-ups with regional players.
 - Business Support Services as seen as an extension of IFM services particularly in Commercial segment. Therefore, IFM companies can be seen foraying into Support Services such as manpower supply, warehousing, and employee background verification services through acquisitions.
 - After COVID-19 crisis, clients prefer organized IFM companies offering a basket of services versus small IFM companies.

Industry Risks and Challenges:

Lack of availability of technical and non-technical labor is one of the biggest challenges the industry is facing currently. The lack of qualified staff has increased the lead times in mobilizing resources/staff after a project has been successfully contracted. Increasing inflation and labour cost have forced many customers to replace long-term contracts with medium-term ones.

Key Challenges in the IFM market are:

- Stiff Competition: The market is highly competitive with the presence of large number of domestic and few international companies. It is also noted that some big domestic companies having principal business in real estate are entering into this market by forming a subsidiary, thereby increasing competition.
- Retention of Workforce: High attrition rate mainly because of high demand for quality manpower and competitive remuneration, is making it difficult to retain skilled workforce, especially in soft services segment.
- Perception of IFM Services: IFM services are perceived to be only traditional housekeeping services which in fact is far beyond
- Lack of Market Maturity: The Indian IFM lags in areas such as market maturity and appreciation for high standards of service delivery
- Price Sensitivity: Customers are highly price sensitive, and this has resulted in increasing preference for FM companies who are non-compliant with regulations related to Provident Fund (PF), Employees State Insurance Scheme (ESIC) etc.

Overview of Employee Transportation Industry

Global Outlook :

The Corporate Employee transportation market size has grown strongly in recent years, It will grow from USD 27.8 Billion in 2020 to USD 42.19 Billion in 2026 and estimated to grow at CAGR of 5.44%.

Rising Corporate Office Presence In Asia-Pacific Fuels Demand For Employee Transportation Services

Growing corporate office presence in the Asia-Pacific region is expected to propel the growth of the corporate employee transportation services market going forward. A corporation's main place of business is regarded as a corporate office. Corporate employee transportation services provide transportation services for the employees working in the corporate offices, as a result, the growing corporate office increases the demand for the corporate employee transportation services market. For instance, in 2022, according to the Economic Times Indian-based newspaper, In the first quarter, the top eight cities added 11.9 million square feet (sq ft) of new office space, up 13% from the same period last year. Bengaluru recorded new completions of 2.5 million sq ft, which was the second biggest volume addition for the quarter. Pune led all markets with new supply additions of 3.6 million sq ft, an increase of 107% on the year. Therefore, increasing corporate office presence in the Asia-Pacific region is expected to boost demand for corporate transportation services during the forecast period.

Automotive Industry Growth Fuels Demand For Corporate Employee Transportation Services

The Indian automotive industry is expected to reach US\$ 300 billion by 2026. This sector's share of the national GDP increased from 2.77% in 1992–1993 to around 7.1% presently. It employs about 19 million people directly and indirectly (**Source - IBEF**). Therefore, growing automobile industry is expected to boost demand for corporate transportation services during the forecast period.

Tech-Driven Innovations Transforming Corporate Employee Transportation Services

Technological advancements have emerged as a key trend gaining popularity in the corporate employee transportation service market. Major companies operating in the corporate employee transportation service market are adopting new technological solutions to sustain their position. With the use of traveler monitoring technology, the company, as well as the provider, may track and contact employees in an emergency with one click. Agents can manage fewer invoices and data sources by using virtual payments to store all trip information in one location.

Employee Mobility Services Industry India overview

The market for corporate employee mobility services is fragmented, including unorganized players. Organized player utilizes the technological assistance for fleet and employee commute management which broaden the scope of their offerings.

The COVID-19 pandemic hampered the market by forcing many companies to work from home, resulting in less employee transportation. However, as economies have recovered from the lockdown, a return to office is expected to provide transportation service operators with numerous opportunities in the coming years. Moreover, governments in various states are also initiatives to improve employee commute systems.

Over the long term, employee mobility services are becoming more popular as people have become more aware of the significance of improved transportation safety measures. In addition, with the low prices offered by transportation providers, employees are choosing them to save time and effort when traveling. Therefore, players are coming up with new product developments and launches for employee mobility services.

Rising incidents of transportation insecurity, assaults, rude behavior, and high fees in ride-hailing and ride-sharing vehicles have prompted employers to consider their employees' safety. This factor is also in charge of driving market growth.

Asia-Pacific is expected to dominate the market due to a growing corporate office presence. It is because many North American and European MNCs are establishing offices, factories, warehouses, and plants in countries such as India, China, and the Philippines, owing to rising demand for goods and low labor costs.

The Corporate Employee Transportation Service Market is segmented by ownership (company-owned transportation service, outsourced transportation service, rentals, and pick and drop transportation service), passenger vehicle type (cars, vans, and bus), service type (Mobility as a Service (MaaS) and Software as a Service (SaaS)).

The market in focus is expected to grow significantly during the forecast period due to an increase in employee numbers across the country.

Industry Overview of Supply Chain Management –

Global Supply Chain Overview

Globally, the warehouse count stood at 1,50,000 warehouses at the end of 2020, roughly 25 Billion square feet of space. By the end of 2025, there will be nearly 1,80,000 warehouses around the world, with China, the US, Japan, India and Germany accounting for more than half of global warehouse building stock.

As per Cargo Connect (Feb 2024) Global Third- Party Logistics (3PL) Market expected to grow at the rate of 9.5% in 2024 to 2027 and expected to reach the market Size of \$ 1,579.84 Billion by 2027.

The Development of the e-commerce industry is the main driver of the market. Asia- Pacific is the largest region in the market.

Supply Chain Management Industry Overview

In the year 2022, the size of the Indian logistics market was around 250 billion U.S. dollar. It was estimated that this market would grow to 380 billion dollars by 2025.

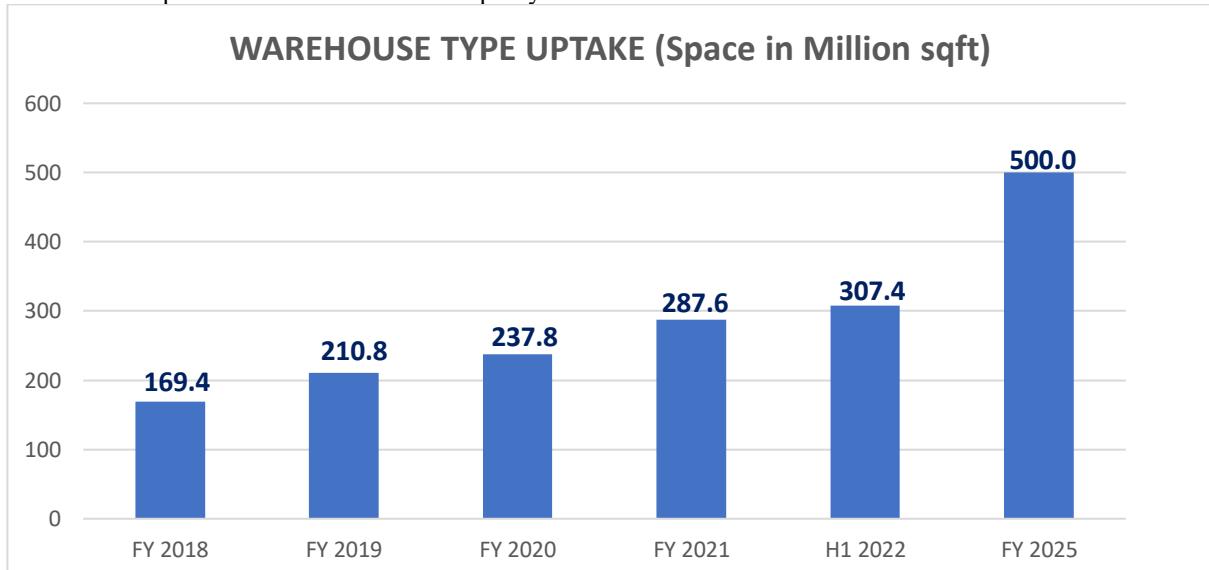

Statistics suggest that the Indian logistics and supply chain market gives employment to more than 22 million people. The warehousing, industrial, and logistics (WIL) sectors are projected to be crucial for attaining India's vision of being a US\$ 5 trillion economy by FY25. The warehouse and logistics industry has benefited the most from the COVID-19 epidemic, increasing its share from 2% in 2020 to 20% in 2021. Because of the growing shift from discretionary to essential internet buying during the COVID-19 epidemic, the e-commerce industry became more appealing and attractive.

The expansion of this industry is likely to be aided by a robust economy, government efforts to improve infrastructure, and a favorable business environment. Increasing consumerism and a huge consumer base are fostering the growth of retail and e-commerce in India. The Indian retail sector's market size is predicted to increase at a CAGR of 9% between 2019 and 2030, totaling more than US\$ 1.8 trillion. Large international funds and corporations have invested in warehousing developers and operators to grow their reach and geographical footprint, which are the sector's key differentiators. The Government of India has taken many initiatives to strengthen the sector's infrastructure, including the establishment of dedicated freight corridors and the extension of road and rail networks, to improve connectivity and decrease travel times. Another critical governmental intervention has been the sector's digital transformation, projects such as Digital India, Bharat Net, and the National Logistics Portal would aid in the industry's digitization. Furthermore, the government has announced the establishment of logistics parks and warehouses across the country to provide appropriate storage facilities for

enterprises. The warehouse sector has grown rapidly in recent years, fueled by the expansion of e-commerce, solid infrastructure, the adoption of GST, and the advent of organized retail. The recently implemented National Logistics Policy intends to reduce India's logistics costs from the double digits of GDP to the single digits by 2030.

A warehouse is an essential component of corporate infrastructure and one of the primary enablers in the global supply chain. The Indian warehousing market is predicted to reach US\$ 34.99 billion (Rs. 2,872.10 billion), expanding at a CAGR of 15.64% from 2022 to 2027. Modern warehouse facilities and technology-driven solutions have changed the warehousing sector in India in recent years. With increased demand and supply throughout the years, the Indian warehousing industry is gaining traction. The key players are third-party logistics (third-party logistics) and e-commerce enterprises, which are growing into tier 2 and 3 cities and eventually increasing their proportion of secondary marketplaces. Businesses are transitioning to a hub-and-spoke model while also implementing technology to simplify operations, with an eye on the larger picture of ease, efficiency, and sustainability.

The warehousing space requirement was at 169.4 million sq ft in 2018 has grown to 307.4 million sq ft by H1 of 2022 and is expected to touch 500 million sq ft by 2025.

Several initiatives have been taken by Govt. to develop the warehousing sector. The introduction of GST, 100% FDI, awarding of infrastructure status to the industry and alternative investment vehicles such as REITs which provide low risk, good capital appreciation opportunities and easy exit routes have aided in investors' interest in warehousing as a new industrial asset class.

Third party logistics (3PL) followed by ecom, is the second largest incentive contributing to the increased demand for grade A warehouses. The ecom is expected to take up 165% more space in Indian warehousing over the next 5 years, while 3PL and other sectors will take up 56% and 43%.

Govt. launched the NLP with the primary goal of lowering logistics costs and streamlining processes for seamless coordination. Moreover, the policy is touted to assist Indian businesses especially MSMEs to become globally competitive as it creates robust logistics infrastructure for facilitating seamless trades.

The logistics sector in India is a crucial component of the country's economy, facilitating the movement of goods and services across various industries. Here's an overview of the logistics business scenario in India:

Rapid Growth: The logistics industry in India has experienced significant growth in recent years, driven by factors such as economic expansion, increasing consumer demand, globalization, and e-commerce boom. The sector is expected to continue expanding due to government initiatives like Make in India and GST (Goods and Services Tax) implementation, which aim to simplify logistics processes and enhance efficiency.

Infrastructure Challenges: Despite growth opportunities, the logistics sector in India faces several challenges related to infrastructure. Issues such as inadequate transportation networks, congested ports, inefficient warehousing facilities, and poor last-mile connectivity impact the overall efficiency and cost-effectiveness of logistics operations.

Technology Adoption: There's a growing trend of technology adoption within the Indian logistics industry. Companies are leveraging digital platforms, IoT (Internet of Things), GPS tracking, and AI (Artificial Intelligence) to improve supply chain visibility, optimize route planning, enhance inventory management, and provide real-time tracking and tracing capabilities.

E-commerce Revolution: The rapid growth of e-commerce in India has transformed the logistics landscape. Logistics providers are adapting to the unique demands of the e-commerce sector, including faster delivery times, order tracking, reverse logistics, and COD (Cash on Delivery) services. This has led to the emergence of specialized logistics players catering specifically to the e-commerce segment.

Government Initiatives: The Indian government has launched various initiatives to modernize the logistics sector and attract investments. These include the Sagarmala project for port-led development, Bharatmala project for road infrastructure development, dedicated freight corridors, and the National Logistics Policy aimed at reducing logistics costs and improving efficiency.

Competitive Landscape: The logistics industry in India is highly fragmented, with a mix of organized and unorganized players. While large logistics companies offer end-to-end solutions and have nationwide reach, there are also numerous small and medium-sized enterprises (SMEs) operating in specific regions or niches. Competition is intensifying, leading to consolidation and partnerships within the industry.

Regulatory Environment: Regulatory compliance, including licensing requirements, taxation, and transportation regulations, can pose challenges for logistics businesses in India. However, efforts to simplify regulations and promote ease of doing business are underway to create a more conducive environment for the logistics sector. Overall, the logistics business scenario in India is dynamic and evolving, presenting both opportunities and challenges for industry players. With the right investments in infrastructure, technology, and regulatory reforms, the logistics sector has the potential to play a significant role in driving India's economic growth and competitiveness on the global stage.

Role of 3PL in Indian logistics market

Third-party logistics (3PL) service providers in India have numerous opportunities to capitalize on the evolving landscape of the logistics industry. Here are some key opportunities for 3PL service providers in India:

E-commerce Logistics: With the rapid growth of e-commerce in India, there is a significant demand for efficient and scalable logistics solutions. 3PL providers can offer services such as warehousing, order fulfillment, last-mile delivery, and reverse logistics to support the booming e-commerce sector.

Specialized Services: There is a growing need for specialized logistics services tailored to specific industries such as pharmaceuticals, FMCG (Fast Moving Consumer Goods), automotive, retail, and healthcare. 3PL providers can offer customized solutions that address the unique requirements and challenges of each industry, including temperature-controlled storage, compliant transportation, and value-added services.

Cold Chain Logistics: With increasing consumer demand for perishable goods such as fresh produce, dairy products, and pharmaceuticals, there is a growing opportunity for 3PL providers to offer cold chain logistics services. This includes temperature-controlled warehousing, transportation, and distribution to ensure the integrity and safety of sensitive products throughout the supply chain.

Technology Integration: 3PL providers can leverage technology to enhance the efficiency, visibility, and transparency of logistics operations. This includes implementing advanced tracking and tracing systems, warehouse management systems (WMS), transportation management systems (TMS), IoT (Internet of Things) devices, and predictive analytics to optimize processes and improve decision-making.

Last-Mile Delivery Solutions: Last-mile delivery remains a critical challenge in the Indian logistics landscape,

particularly in urban areas with dense populations and congested traffic. 3PL providers can innovate by offering innovative last-mile delivery solutions such as crowd shipping, locker-based delivery, drone delivery, and micro-fulfillment centers to improve speed, reliability, and cost-effectiveness.

Supply Chain Visibility: There is a growing demand for end-to-end supply chain visibility solutions that provide real-time tracking, monitoring, and analytics capabilities. 3PL providers can offer visibility platforms and services that enable shippers to track their shipments, monitor inventory levels, and optimize supply chain performance.

Value-Added Services: Beyond traditional logistics services, there is an opportunity for 3PL providers to offer value-added services such as packaging, labelling, kitting, assembly, quality inspection, and product customization. These services add value to the supply chain and help differentiate 3PL providers in a competitive market.

Rural Logistics: With increasing focus on rural development and expanding market opportunities in rural areas, there is a growing need for logistics solutions tailored to the unique requirements of rural supply chains. 3PL providers can explore opportunities to serve rural markets by offering innovative transportation, distribution, and warehousing solutions that address infrastructure challenges and improve access to goods and services. 3PL service providers in India have a wide range of opportunities to expand their offerings, innovate with technology, and differentiate themselves in the market by addressing evolving customer needs and industry trends. By leveraging these opportunities, 3PL providers can drive growth, increase market share, and create sustainable competitive advantages in the dynamic Indian logistics landscape.

Our Strategies

- **Retain, strengthen and grow customer base with a focus on deepening relationships with existing customers**

Our contracts with most of our customers is for a period of at least one year which subsequently gets renewed, on an ongoing basis. As a result, our business is on an annuity-based model where a customer once secured, generates revenue over a long period of time. We have over the years established long-term relationships with our customers leading to recurrent business engagements with them. We believe we have been able to retain existing customers and attract new customers because of our brand, strong market position and delivery of quality services. Our average customer retention ratio is 85% for the Financial Years ended March 31, 2022, 2023 and 2024. We believe that our customer retention levels reflect our ability to provide high quality services, and our consistent customer servicing standards have enabled us to increase our customer dependence on us. This has also allowed us to cross-sell our offerings to our customers thus resulting in a higher wallet share from our customers in the different service segment like IFM, Employee Transportation services, Corporate Food Solution Services, Supply Chain Management Services.

We believe that we will grow as our customers grow owing to an increase in the volume of services, the scope of services and the value add of services. As the scope and value of outsourced IFM and other Support Services increases, the demand for organized and standardized services and subsequent outsourcing of such services to organized service providers like us will also increase. The increasing demand for facilities management services, stringent quality and compliance standards and the increased need for mechanized cleaning, are the key industry trends which will drive demand for organized facilities management and as a result, will consolidate the business amongst organised players. Our wide presence is also expected to drive our growth as customers seek larger partnerships with fewer service providers thus consolidating their business partner network. We also intend to further develop and implement technological and customer-oriented initiatives as we believe these will allow us to diversify our service offerings and exploit future growth opportunities. We believe a robust and loyal customer base is a significant strategic advantage to our Company and this is a strategy that we intend to pursue strongly into the future.

- **Grow market share in key segments**

We seek to grow our business through the acquisition of new customers across industry segments such as commercial real estate, industrial facilities, warehousing and public infrastructure such as airports, amongst others. Our customer acquisitions are usually undertaken through two mechanisms: mining and business development. Mining is where our customer facing teams get additional business from existing customers. The role of our business development team is to procure new customers including through our digital presence. We have a qualified sales and marketing team consisting of 6 employees, as on May 31, 2024 who focus on customer development and maintaining customer relationship. A significant portion of our business development activities is undertaken by our regional operation heads.

In addition, we also intend to acquire new customers by becoming more competitive quality of services, technology and persistent customer development efforts. The increasing demand for integrated facilities management, stringent quality and compliance standards, and the increased need for mechanized cleaning, are key industry trends which will drive demand for organized integrated facilities management and as a result, is expected to consolidate the business amongst organized players. As the scope and value add of outsourced integrated facilities management increases, the demand for organized and standardized services and subsequent outsourcing of such services to organized service providers like us will also increase.

We believe we are well placed to capitalize on the expected growth in the IFM & Other Support services industry owing to our brand presence and our ability to effectively undertake our services, by targeting

not only our existing customers, but also new customers. In addition, we have a qualified business development team with experienced individuals who focus on acquiring new customers across our business segments. Our offering of Employee transportation also will add the further growth in the business as every Industrial or IT sector required the Employee transportation service for their pickup and drop facility. As employee transportation required CAPEX investment which leads to increase in the business of organized players like us as after COVID impact the small player are not able to invest in CAPEX.

- **Introduce new products and services catering to existing and new customer segments**

While, we are focused, and integrated business services platform in India, we intend to further grow our position in the market and towards this end, we aim to introduce new products and services to fill gaps in our current portfolio or to enter new segments which we see as potentially large and margin accretive to us. Like we have started the supply chain management services during COVID which are giving business growth with good margin. We intend to leverage the growth of Indian economy and business opportunities and introduce newer products and services within the traditional definition of integrated facilities management, corporate food solution and supply chain management services as well as within the overall segment of our service portfolio. Our strategy on new products and services is constantly evolving basis feedback from our customers and our perception of market trends. Some of these new products and services will be organically developed and in some cases, we will examine an entry through different routes such as partnerships, alliances, minority investments, joint ventures as well as acquisitions. This will be in line with our prior investments and acquisitions such as Everdew Engineering Private Limited (Acquisition of 66.67% stake in Everdew Engineering Private Limited to expand the service portfolio in production support service) and Trimurty Utility Services Private Limited (Acquisition of 55% stake in Trimurty Utility Services Private Limited to expand the service portfolio in corporate food solution services and further addition of the customer in IFM), pursuant to which, we added services such as Production Support Service and Corporate Canteen business. All our acquisitions have added either a new customer segment, new service line, or a new geography to us. We have not only expanded horizontally by venturing into entirely new service lines but also offered services that are complementary to our existing services portfolio.

- **Pursue inorganic growth through strategic acquisitions of high margin businesses supplemental to our operations**

Over the years, we have focused on moving up the value chain of complexity and specialization by enhancing our product and service portfolio, including through acquisitions, in order to be able to provide diversified and more complex services to our customers. As our service capabilities evolve, we intend to increase our focus on further diversifying our services portfolio and providing higher value added and consequently, higher margin services to our customers.

Even as we continue to focus on maintaining and enhancing our organic growth momentum, we intend to further explore inorganic expansion by leveraging on the experience that we have gained through our prior acquisitions, with a particular focus on niche high-margin businesses. We have grown our business, geographical presence and our service portfolio over time, through strategic acquisitions in the past which have further enhanced our business operations, growth, margin profile and future prospects. We intend to pursue opportunities to undertake acquisitions (i) that allow us to enhance our scale and market position; (ii) that allow us to achieve operating leverage in key markets by unlocking potential efficiency and synergy benefits; (iii) that provide us with a platform to extend our reach to new geographic markets within India, particularly for hard service, Production Support Service and new geography; and (iv) that add new services complementary to our service offerings or that allow us to enter strategic businesses to capture additional revenue opportunities from our existing customer base to better our margin profile. To this end, we intend to utilise a portion of the proceeds of the Fresh Issue towards funding acquisitions.

- **Continue to improve operating margins**

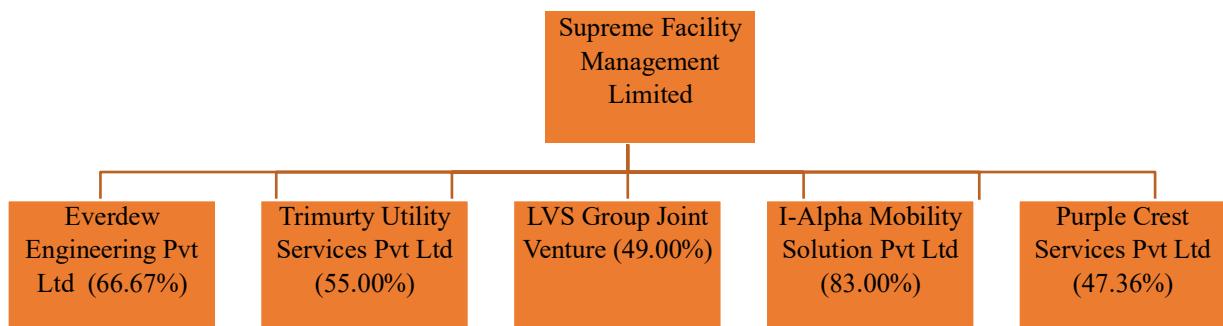

Operating margin improvement is one of our key metrics to measure our performance and is also reflected in the performance metrics for our employees as well as in our budgeting process. Our margin

improvement strategy rests on four key pillars:

- Improving operating leverage: The idea here is to manage larger revenue streams with non-linear increases in our fixed and operating costs. We intend to implement lower percentage increases in our fixed costs as compared with our revenues and therefore, improve EBITDA margins. We are also exploring a shared services model to lower the costs of common services within our group and this is also expected to improve operating leverage on a consolidated level.
- Technology leverage: We believe there is significant scope to leverage technology in our service delivery, customer interaction as well as in our internal processes, including the management of the entire employee life cycle. Adoption of technology, we believe, will help bring more efficiency, accuracy and quality to our way of working and thus, reduce operating cost. We are, accordingly, moving towards making our processes paperless and touchless.
- Service mix within each business: The idea is to develop, enhance and promote more value-added services to existing and to new customers. We will also continue to focus and invest in industries and geographies that we believe present opportunities to increase our operating margins.
- Business mix within the group: We are focused on growing our higher margin businesses aggressively and this growth is expected to improve our margin profile on a consolidated level. This is expected to be through resourcing the business support services and other high margin businesses like employee transportation, corporate canteen and production support service; This strategy also assumes significance given our intent to acquire businesses that are net margin accretive on a consolidated level.

Subsequent expenditure relating to fixed assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Fixed assets acquired and put to use for project purpose are capitalized and depreciation thereon is included in the project cost till commissioning of the project.

Fixed assets acquired in full or part exchange for another asset are recorded at the fair market value or the net book value of the asset given up, adjusted for any balancing cash consideration. Fair market value is determined either for the assets acquired or assets given up, whichever is more clearly evident. Fixed assets acquired in exchange for securities of the Company are recorded at the fair market value of the assets or the fair market value of the securities issued, whichever is more clearly evident.

Fixed assets retired from active use and held for sale are stated at the lower of their net book value and net realizable value and are disclosed separately in the Balance Sheet.

Capital work-in-progress:

Projects under which assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

Notes to Re-Statement Consolidated Financial Statement for the period ended 31 March 2024

(All amounts are in INR lakhs unless otherwise stated)

2.10 Foreign currency transactions and translations

Transactions in foreign currencies entered by the Company and its integral foreign operations are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement of foreign currency monetary items at the Balance Sheet date

Foreign currency monetary items (other than derivative contracts) of the Company and its net investment in non-integral foreign operations outstanding at the Balance Sheet date are restated at the year-end rates. In the case of integral operations, assets and liabilities (other than non-monetary items), are translated at the exchange rate prevailing on the Balance Sheet date. Non-monetary items are carried at historical cost. Revenue and expenses are translated at the average exchange rates prevailing during the year. Exchange differences arising out of these translations are charged to the Statement of Profit and Loss.

Treatment of exchange differences

Exchange differences arising on settlement / restatement of short-term foreign currency monetary assets and liabilities of the Company and its integral foreign operations are recognized as income or expense in the Statement of Profit and Loss. The exchange differences on restatement / settlement of loans to non-integral foreign operations that are considered as net investment in such operations are accumulated in a "Foreign currency translation reserve" until disposal / recovery of the net investment.

The exchange differences arising on restatement / settlement of long-term foreign currency monetary items are capitalized as part of the depreciable fixed assets to which the monetary item relates and depreciated over the remaining useful life of such assets or amortized on settlement / over the maturity period of such items if such items do not relate to acquisition of depreciable fixed assets. The unamortized balance is carried in the Balance Sheet as "Foreign currency monetary item translation difference account" net of the tax effect thereon.

Accounting of forward contracts

Premium / discount on forward exchange contracts, which are not intended for trading or speculation purposes, are amortized over the period of the contracts if such contracts relate to monetary items as at the Balance Sheet date.

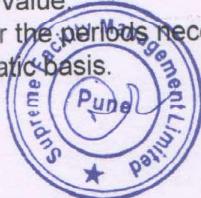

2.11 Government grants, subsidies and export incentives

Government grants and subsidies are recognized when there is reasonable assurance that the Company will comply with the conditions attached to them and the grants / subsidies will be received. Government grants whose primary condition is that the Company should purchase, construct or otherwise acquire capital assets are presented by deducting them from the carrying value of the assets. The grant is recognized as income over the life of a depreciable asset by way of a reduced depreciation charge.

Export benefits are accounted for in the year of exports based on eligibility and when there is no uncertainty in receiving the same.

Government grants in the nature of promoters' contribution like investment subsidy, where no repayment is ordinarily expected in respect thereof, are treated as capital reserve. Government grants in the form of non-monetary assets, given at a concessional rate, are recorded based on their acquisition cost. In case the non-monetary asset is given free of cost, the grant is recorded at a nominal value.

Other government grants and subsidies are recognized as income over the periods necessary to match them with the costs for which they are intended to compensate, on a systematic basis.

2.12 Investments

Long-term investments (excluding investment properties) are carried individually at cost less provision for diminution, other than temporary, in the value of such investments. Current investments are carried individually, at the lower of cost and fair value. Cost of investments include acquisition charges such as brokerage, fees and duties. Investment properties are carried individually at cost less accumulated depreciation and impairment, if any. Investment properties are capitalized and depreciated (where applicable) in accordance with the policy stated for Tangible Fixed Assets. Impairment of investment property is determined in accordance with the policy stated for Impairment of Assets.

2.13 Employee benefits

Employee benefits include provident fund, superannuation fund, gratuity fund, compensated absences, long service awards and post-employment medical benefits.

Defined contribution plans

The Company's contribution to provident fund and superannuation fund are considered as defined contribution plans and are charged as an expense as they fall due based on the amount of contribution required to be made.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognized during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service. The cost of such compensated absences is accounted as under: (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and (b) in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognized as a liability at the present value of the defined benefit obligation as at the Balance Sheet date less the fair value of the plan assets out of which the obligations are expected to be settled. Long Service Awards are recognized as a liability at the present value of the defined benefit obligation as at the Balance Sheet date.

2.14 Borrowing costs

Borrowing costs include interest, amortization of ancillary costs incurred and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Costs in connection with the borrowing of funds to the extent not directly related to the acquisition of qualifying assets are charged to the Statement of Profit and Loss over the tenure of the loan. Borrowing costs, allocated to and utilized for qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset up to the date of capitalization of such asset is added to the cost of the assets. Capitalization of borrowing costs is suspended and charged to the Statement of Profit and Loss during extended periods when active development activity on the qualifying assets is interrupted.

2.15 Segment reporting

The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organization and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are evaluated regularly by the executive Management in deciding how to allocate resources and in assessing performance.

The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments based on their relationship to the operating activities of the segment.

Inter-segment revenue is accounted for based on transactions which are primarily determined based on market / fair value factors. Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under "unallocated revenue / expenses / assets / liabilities".

2.16 Leases

Where the Company as a lessor leases assets under finance leases, such amounts are recognized as receivables at an amount equal to the net investment in the lease and the finance income is recognized based on a constant rate of return on the outstanding net investment.

Assets leased by the Company in its capacity as lessee where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalized at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognized as operating leases. Lease rentals under operating leases are recognized in the Statement of Profit and Loss on a straight-line basis.

2.17 Earnings per share

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares decreases the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

2.18 Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognized as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognized on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognized for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognized only if there is virtual certainty that there will be sufficient future taxable income available to realize such assets. Deferred tax assets are recognized for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realized. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realizability.

Current and deferred tax relating to items directly recognized in equity are recognized in equity and not in the Statement of Profit and Loss.

2.19 Provisions and contingencies

A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.

2.20 Derivative contracts

The Company enters derivative contracts in the nature of foreign currency swaps, currency options, forward contracts with an intention to hedge its existing assets and liabilities, firm commitments and highly probable transactions.

Derivative contracts which are closely linked to the existing assets and liabilities are accounted for as per the policy stated for Foreign Currency Transactions and Translations. Derivative contracts designated as a hedging instrument for highly probable forecast transactions are accounted as per the policy stated for Hedge Accounting.

All other derivative contracts are marked-to-market and losses are recognized in the Statement of Profit and Loss. Gains arising on the same are not recognized, until realized on grounds of prudence.

2.21 Insurance claims

Insurance claims are accounted for based on claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

SIGNIFICANT DEVELOPMENTS SUBSEQUENT TO THE LAST AUDITED FINANCIALS

After the date of last Audited accounts i.e. March 31, 2024, the Directors of our Company confirm that, there have not been any significant material developments.

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subjected to various risks and uncertainties, including those discussed in the section titled "***Risk Factor***" beginning on page 27 of this Draft Red Herring Prospectus. Our results of operations and financial

conditions are affected by numerous factors including the following:

CUSTOMER ACQUISITION AND CUSTOMER RETENTION

Our customers range across a variety of industries and sectors, including Automobiles, Engineering, Manufacturing, ITes, Fashion and Retail, which reduces our vulnerabilities to economic cycles. We believe our ability to offer customized facility management services, Employee transportation, Corporate Food Solution, Warehouse management Service and Production Support Service fit the needs of our customers across our various business segments allows us to deepen our relationships with our customers and enables us to target a greater share of their requirements. Our continued relationships with these customers and ability to acquire and onboard new customers plays a significant role in our growth and results of operations. We anticipate that our offerings, the quality thereof and market position in key service segments will help us in increasing our share of business amongst our existing customers as well as increase our customer base. However, a slow-down in demand for these customers' services would likely have an adverse effect on our revenues and results of operations.

COST AND AVAILABILITY OF SKILLED MANPOWER

The services we offer are manpower intensive and we hire a considerable number of personnel every year to sustain our growth. As of May 31, 2024 we employed 11,129 employees across our operations and back-end support. We leverage various channels like print media, digital advertisements, referral programs, job fairs and recruitment drives in rural areas for our recruitment. The decisions in respect of selection and hiring of employees are made solely on the basis of the job requirements and our focus is to recruit applicants who are suitably qualified and trainable for employment. We hire employees on a regular, temporary, contractual and trainee basis and conduct reference checks for all our candidates before appointment, including feedback from the referees where applicable. Our performance parameters and assessment of our employees are tied to a capability analysis of each employee and based on merit and quality of service resulting in an identification of high performing employees. The employee rating is based on various key performance indicators.

We cannot assure you that we will be able to meet our manpower requirements in the future or grow the number of our employees in a consistent manner. Our business operations and financial performance may be adversely affected if we are unable to find sufficient personnel for our businesses. In addition, we must continually evaluate and upgrade our recruiting and training programs to keep pace with changing customer needs and emerging technologies. We may not be able to effectively meet the expectations of our customers due to our failure to identify personnel with the requisite skills, experience or other attributes, and our training programs may not succeed in developing effective skills in a timely manner or at all.

Our employee benefit expenses were ₹ 20547.59 Lakhs, ₹ 17513.45 Lakhs and ₹ 13112.51 Lakhs for the Fiscals 2024, 2023 and 2022 respectively. We believe that our Company's growth and work environment combined with our employee satisfaction rate has allowed us to attract talent on a large scale. In addition, the presence of varied profiles available in our organization coupled with high growth potential facilitates leads to higher retention of employees. However, increases in our employee benefits payment obligations including due to changes in applicable laws, including minimum wage laws, which we are unable to pass on to our customers, in a timely manner, or at all, could have a significant impact on our total expenses and consequently our financial condition. In addition, we rely on our employees to render services at our customers' premises and in the event our employee relationships deteriorate or if we experience labour unrest, strikes and other labour action, there could be an adverse impact on our delivery of services to customers.

ABILITY TO OPTIMIZE PRICING STRATEGY

We negotiate pricing terms for a particular contract utilizing a range of pricing structures and conditions, including cost-plus contracts, fixed price contracts and/or SLA linked contracts. Our pricing is dependent on our internal forecasts, which may be based on limited data and could prove to be inaccurate. If we do not accurately estimate the costs and timing for completing fixed price or SLA linked contracts, such contracts could prove unprofitable for us or yield lower profit margins than anticipated. There is a risk that we will under-price our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, delays or failures to achieve anticipated cost savings, or unexpected risks we encounter in connection with the performance of such contracts, including those caused by factors outside our control, or any failure to complete our contractual obligations at the committed service

levels could adversely affect our revenue and profitability. In addition, we are also exposed to unforeseen changes in the scope of existing contracts, either in terms of pricing or volume and quality of services that may occur as a result of any changes in the general business or internal management and industry-practice of our clients.

REGULATORY ENVIRONMENT FOR THE LABOUR MARKET IN INDIA

We are subject to labour legislations that protect the interests of workers, as well as laws and regulations relating to employee welfare and benefits such as minimum wage and maximum working hours, overtime, working conditions, non-discrimination, employee compensation, employee insurance, bonus, gratuity, provident fund, leave benefits and other such employee benefits. These laws in India are enacted both by the Central Government and the State Governments in India. These laws and regulations vary from state to state in India and are subject to changes. See “**Key Regulations and Policies**” on page 129 for details. These legislations require compliance, from time to time, which may among others, involve payments to be made depending upon their period of employment. If we fail to comply with labour welfare legislations, we may be exposed to fines and we may also face the risk of our licenses under applicable legislations being cancelled or suspended. Further, in the event the welfare requirements under labour regulations applicable to us are changed, which leads to an increase in employee benefits payable by us or results in a or a steep increase in minimum wages payable by us, there can be no assurance that we will be able to recover such increased amounts from our customers in a timely manner, or at all. Our profit margins may get adversely impacted if we are unable to pass on such costs and cost increases to our customers on a concurrent basis.

COMPETITION

We operate in a competitive environment, and we expect to face greater competition from existing competitors in India. We compete with different companies depending on the market and type of products and services currently offered by us. The Indian integrated facilities management market is highly fragmented with close to 400-500 companies operating across the country. Some of our competitors may have more resources than us or have greater financial, technological and other resources, while certain competitors may have lower cost of operations. We also face the risk of our current or prospective customers deciding to utilize their internal workforce or use independent contractors or service providers in the unorganized segment to manage their facilities. We believe that our ability to compete as well as offer competitive prices is highly dependent on our ability to optimize our services portfolio and operations. As we continue to expand our operations into new geographies, business verticals or end-user segments, we are exposed to competition from newer players. There can be no assurance that we will be able to successfully compete with our competitors or be able to sell our products at desired margins. Enhanced competitive presence could manifest itself in various ways such as pricing pressure, increased competition for customer acquisition and retention, competitive product and service offerings with enhanced features and also competitive pressure on talent acquisition and retention thereby leading to enhanced costs.

LITIGATIONS

There are outstanding litigation proceedings involving our Company and Group Companies, an adverse outcome in which, may have an adverse impact on our reputation, business, financial condition, results of operations and cash flows.

APPROVALS OR LICENSES

Our Company require a number of approvals or licenses (Labour License, Shop & Establishment, Trade License, FSSAI Licenses, etc.), registration and permits for our business and failure to obtain or renew them in a timely manner may adversely affect our operations.

FINANCIAL INDEBTEDNESS

Our Company have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

OTHERS

We are dependent on third party vendors to provide services to our customers. Any failure on part of such service

providers to meet their obligation could have a material adverse effect on our business, financial condition and results of operations.

SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹500,000 shall use the UPI Mechanism.

Further, SEBI has vide its circular no. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue

closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and was replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than 1 (one) Working Day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Issue BRLM will be required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹5 lakh, shall use the UPI Mechanism. Individual investors Bidding under the Non-Institutional Portion Bidding for more than ₹2 lakh and up to ₹5 lakh, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or
